Have You Neurasthenia?

Neurasthenia is a condition of exhaustion of the nervous system. The causes are varied. Continuous work, mental or physical, without proper vacation periods, without proper attention to diet and exercise, also worry over the struggles for success, are the most common causes. Excesses of almost any kind may produce some diseases, like the grip, will cause neurasthenia. So also will a severe shock, intense anxiety or grief.

The symptoms are over-sensitiveness, irritability, a disposition to worry over trifles, head aches, nervousness, nausea. The treatment is one of nutrition of the nerve cells, requiring a non-alcoholic tonic. As the nerves get their nourishment from the blood, the treatment must be directed toward building up the blood. Dr. Williams' Pink Pills act directly on the blood and with proper regulation of the diet have proved of the greatest benefit in many cases of neurasthenia. A tendency to anaemia, or bloodlessness, shown by most neurasthenia patients, is also corrected by these tonic pills. Our own druggist sells Dr. Williams' Pink Pills.

Two useful books, "Diseases of the Nervous System" and "What to Eat and How to Eat," will be sent free by the Dr. Williams' Medicine Co., Schenectady, N. Y., if you mention this paper.—Advertisement.

Acid Stomachs Are Dangerous

Common Sense Advice by a Distinguished Specialist: "Acid" stomachs are dangerous because acid irritates and inflames the delicate lining of the stomach, thus hindering and preventing the proper action of the stomach, and leading to probably nine-tenths of the cases of stomach trouble which people suffer. Ordinary medicines and medicinal treatments are useless in such cases. The cause of the trouble is the trouble, the acid in the stomach, as dangerous as ever. The acid must be neutralized and its formation prevented, and the best thing for this purpose is a teaspoonful of bisulphated magnesia, a simple antacid, taken in a little warm or cold water after eating, which not only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause distress may be eaten with impunity if the meal is followed with a little bisulphated magnesia, which can be obtained from any druggist, and should always be kept handy.—Advertisement.
