# in France With Both Sides Claiming Success Infantry Reported to Be Fighting Hand to Hand at Various

Points; Soldiers of Three Great Armies Are Becoming Exhausted; Trenches Are Filled With Water Because of Heavy Rains, Adding Greatly to Discomforts of Men; Worn Out Fighters are Succumbing to Hardships

There is no victory as yet for either side in the battle of the Aisne which has now waged in France for ten days. Both sides claim successes and favorable positions.

The ten days of desperate battle, fierce artillery fire day and night, infantry charges in which the fighting has been hand to hand and cavalry onslaughts when opportunity offered, have shown one result-the soldiers of the three nations engaged are becoming exhausted. The human machine is weakening under the frightful demands made upon it. Lulls in the battling are ascribed simply to

Another factor which has had a notable effect on the conduct of the operations has been the weather. An incessant cold rain has flooded the valley of the Aisne. The river has overflowed its banks, roads and fields are heavy, and trenches filled with water. The men are drenched to the skin day and night and French soldiers coming to Paris from the front are encrusted with mud. Worn out men are succumbing to the hardships of fighting and living in the open under

Transportation of all kinds for both sides is rendered much more difficult. It is even said the Germans can no longer move their heavy artillery with effective promptness on account of heavy roads. The men are camping in water and the French say the Germans are suffering from lack of food.

NEITHER CLAIM DECISIVE OUTCOME

While neither side claims a decisive outcome yet there appears to be good reason to believe that the battle is drawing to definite development. Military opinion both in London and Paris leans to the conviction that the present lines, battered for ten days, soon will have to show noticeable changes. The fighting is fiercest on the allies left where desperate efforts are being made to turn the flank on the German army under General Von Kluck. Von Kluck has been reinforced, but in spite of this the French in late official reports claim an advantage, though it is admitted to be slight. The Germans appear to be making desperate and persistent efforts to turn the right wing of the allies, resting on Verdun. The help of this fortified position is of advantage to the French.

On the center the fortunes of war fluctuate. The positions now held by the Germans were well selected and well fortified. Some of their heavy artillery is described as resting upon cement foun-

A news dispatch received in London from France says an aeroplane reconnaisance has given rise to the conviction that a large portion of the German forces is retiring in the direction of fortified

positions on the German border.

LETTER OF PROTEST FROM FRANCE The destruction by Germans who set fire to the famous cathedral of Rheims, has been made a matter of protest on the part of the French government. Berlin, in an official statement asserts that the fire of the French came from the direction of the cathedral and the necessity of bombarding it is regretted.

The French navy acting in conjunction with the British naval forces in the channel and the North Sea has aided in retaining command of the seas which has been in the hands of the allies since the war began, according to an official French review of the work of

Przemysl, the strongly fortified Austrian position between Lemberg and Cracow in Galicia, is engaging the enemy. It is resisting the invading Russians with artillery fire. It is said that a strong German army is at Przemysl.

Berlin says there is no news from the Russian front. The ating of the German war loan is described as a brilliant success The official afternoon statement from Paris says that terrific

## "Dum Dum" Wounds Due to | Villa May be Chosen Spitz Balls, Says Expert

Special to The Telegraph
New York, Sept. 21. — The editor of
the Medical Record says in yesterday's
issue that both the Germans and the
allies are mistaken in their acusations
concerning the employment of dumdum bullets in the present war. The
terrible injuries recorded are undoubtedly inflicted by the so-called Spitz bullets.

Special to The Telegraph
Vera Cruz, Sept. 21.—That General
Francisco Villa will be named to succeed General Carranza as Supreme
Chief of the Constitutionalist party
when the Generals and Governors
meet in the capital on October 1 is the

terriple injuries to the confidence of the capital on October 1 lets.

"The explanation of the error on both sides is not far to seek. In the editorial comment on Colonel LaGarde's recent work on 'gunshot injuries' we prophesied that there would be a return to inhumanity in the next war, because of the use of the Spitz bullet, recently introduced in Germany and adopted by several other armies, that of Great Britain and the United States among them.

Britain and the United States among them. This bullet is quite short, of conical shape and tapers so gradually that the center of gravity is thrown back near the base. Consequently, in spite of its great initial velocity and flat projectory, it has a tendency, although it will go through the soft part, making a small, clean-cut channel, and do little or no injury.

"The least resistance upsets it, and in turning at great velocity the wounds it inflicts are much lacerated and otherwise attended with destructive effects not unlike the wounds inflicted by dum-dum bullets."

### Credit and Confidence

Mr. Manufacturer — We do not have to argue with you to prove that business is run by credit, and credit is founded on confidence.

Advertising that will sell your goods must be built on the same ground.

Confidence is the rock on which the newspaper is constructed. It exists, it thrives, it has influence because it has the confidence of its readers. If there was no other reason for newspaper advertising than this one it would be sufficient.

Newspapers sell goods for their advertisers because news-paper readers regard their pa-pers as trustworthy friends and advisers.

Manufacturers who desire to use newspapers to the best advantage are invited to address the Bureau of Advertising, American Newspaper Publishers Association, World Building.
