Rosoboro.

IE NEW LIGHT BAKER ELECTRIC is a Full Half Ton Less Than Many Other Electrics

Easy Steering: High Speed and Mileage: Reduced Upkeep Cost: Steering is no effort. Imagine the relief in being rid of 1000 pounds when driving over a rough pavement through a jam of traffic. And speed! 23 miles per hour—probably the greatest ever built into an electric coupe. Better speed and just as good mileage with 32 cells of battery as heavier electrics with 40 to 42 cells—weight is the greatest handicap to both speed and mileage. Much lower cost of upkeep—weight is the most expensive thing about a motor car; it wears out tires, consumes power, grinds out bearings, increases repair bills. Longer life of car—excess weight pounds itself to pieces. Rides with unusual comfort—light body hung low on long chassis equipped in the rear with Cantilever springs. Light, graceful exterior impossible with heavy bulky cars.

Unique Seating Arrangement:
of the time, one or two passengers.

of the time, one or two passengers.

The new light Baker is designed to meet these actual conditions. It is a roomy four-passenger Coupe, instantly convertible into a two or a three-passenger car merely by folding back the front seats (new disappearing type) out of sight and out of the way. Thenk of the pleasure of riding without empty front seats.

Advanced Equipment: Frameless windows throughout; front window drops way down. Invisible drip moulding; fixed rain visor. Mechanical window lifts; automatic circuit breaker; automatic door witch for interior lighting; combination eight-day clock and odometer. Worm drive axle; crown metal fenders. Exquisitely rich interior upholstered with exclusive imported fabrics in beautiful Poiret colorings. From every standpoint this new light Coupe is the finest Baker Electric ever made.
