## FINAL INSPECTION OF HOME GARDENS

### Outdoor Committee of Civic Club Will Award Prizes to Children

When the out-of-door committee of the Civic Club gave out packages of flower seeds last Spring to 542 children of the city, they little realized what energy and work the youngsters would put into their potsy beds.

These "Home Gardens" have proved one of the greatest undertakings of the Civic Club, so the committee which has made several inspections, says final visits will be made this week and the prize winners will be announced and their gifts presented on Monday, October 19, at the first Fall meeting of the Civic Club.

In awarding the prizes, not only the beauty of the gardens, but the work put on them will be taken into consideration, for while some of the children had excellent soil to start with and worked under most favorable conditions, others had only patches of brick in their yards and were forced to plant the seeds in boxes, getting wonderful results some times. Then the soil in many places was principally of clay and ashes and the young gardeners had to get fertilizer and better earth, working with a will to get their seeds started right. And they all have been most faithfully tended.

## Is Coal All Alike?

We have heard many persons say, "I don't think there is any difference in coal, it's all alike."

All coal is not alike. Just because it looks alike is no evidence that it is all alike.

We have a list in our office of more than 300 coal mines and collieries in Pennsylvania producing coal of varying degrees of hardness.

The coal from some mines is very inferior in quality while that from others is excellent.

Anthracite mines produce Soft Coal, Medium Coal, Hard Coal, Extremely Hard Coal, etc. All these kind give different results.

We have made a careful study of the coal business and know which kind is best.
