Mr. George A. Douglas, No. 49 East 131st St., New York, N. Y., writes: 'As my work compels me to spend a large part of my time out of doors, I have often been drenched by sudden rains, chilled by extreme cold, and I soon found that I had a bad case of catarrh of the bronchial tubes.

"I tried plasters and medicine, but nothing I did seemed to help me until I trock Perupa.

I took Peruna.
"This splendid medicine took right

hold of me, drove every bit of the disease out, and built me up until I felt stronger than I had for years. "Whenever I have been exposed now a couple of doses always restores me. Peruna is an ideal protector in all sorts of weather."

For years, common bold-sulphur has occupied a secure position in the treatment of cutaneous affections, by reason of its parasite-destroying property. It is not only parasiticidal, but also anti-pruritic, antiseptic and remarkably healing in irritable and inflammatory conditions of the skin.

The moment you apply it to an itching or broken out skin the itching stops and the healing begins, says a noted dermatologist. Just common bold-sulphur made into a thick cream effect such prompt and remarkable results, even in aggravated Eczema that it is a never-ending source of amazement to physicians.

While not always establishing a permanent cure it never fails to subdue the angry itching and irritation and heal the Eczema right up and it is often years later before any eruption again appears on the skin.

Any good pharmacist will supply an ounce of bold-sulphur which should be applied to the irritated or inflamed parts, like the ordinary cold creams. It isn't unpleasant and the prompt relief afforded is very welcome, particularly when the eruption is accompanied with Itching. stitutions are first the home, second the school, and third the church, and the measure of any people is the measure of their devotion to those spiritual forces that underlie a condition of our industrial and civic problems. Do not forget that a nation that forgets God shall perish, and that a civilization that builds its hope upon the industries and upon its laws will utterly fall, if underneath we do not set the everlasting arm of good, clean homes and fine schools and splendid churches; for these are the props upon which our progress and our stability as a people rest.

"What are we doing to make the lives of our people sweet and clean and helpful and wholesome in our homes, where our children open their eyes into the light of day, and where they grow, if grow they ever do, into good men and good women? By our interest, our sympathy, our support of the schools of our community, into which we send our children that their minds may be trained to think clearly and their consciences to respond quickly that their conduct as well as their thought shall be right, and into our churches where through the Sunday school they are nursed and reared and trained to be citizens not only of this kingdom militant but the Kingdom Eternal with the Father.

Dr. Brumbaugh's View

"An ounce of constructive service is worth a ton of denunciation," was the comment of Dr. Brumbaugh yesterday on the campaign. He expressed the above opinion when asked to comment on the criticisms of him made by rival candidates. Nor would be say a word by way of attack on them. He, however, reiterated his determination to conduct the Government of the State if elected independent of any outside influence, to insist that good roads be built with funds to be made available by economy, and to exert himself to the utmost for a workman's compensation and a child labor law.

When he was asked to comment on criticisms by campaign speakers he said:

"The people will answer on Novem."

Now the automatics and the rifles

Now the automatics and the rifles from the redoubt to which the Browns had fallen back opened fire. So close together were these bullet-machines that the orbit of each one's swing made a spray of only a few yards' breadth over the redoubt, where the Browns' gun-fire had not for a moment ceased its persistent shelling, with increasingly large and solid targets of flesh for their practice. The thing for these targets to do, they knew, was to intrench and begin to return the infantry and automatics' fire. Desperately, with the last effort of courage, they rose in the attemptose into playing hose streams of bullets whose close hiss was a steady undertone between shell bursts. In the
