COLONEL ROOSEVELT TO DR. BRUMBAUGH

Shortly after Theodore Roosevelt assumed the office of Chief Executive of the nation, Dr. Martin G. Brumbaugh, Commissioner of Education of Porto Rico, sent him his resignation. The following telegram shows how anxious Colonel Roosevelt was for Dr. Brumbaugh to again take the position, even after the latter had left the island and joined the faculty of the University of Pennsylvania:

THE WESTERN UNION TELEGRAPH COMPANY. INCORPORATED. \$1,000 OFFICES IN AMERICA. CABLE SERVICE TO ALL THE WORLD.

RECEIVED at 100STON HALL, U. of Penna. Phila. Dated White House Washington D.C. To Hon Mr G Brumbaugh

Since that time Dr. Brumbaugh has materially added to his splendid reputation as an Educator and Publicist, and the excellent qualities which he manifested when he was in charge of the Public Schools of Porto Rico have been many times enhanced by his brilliant career as Superintendent of the Public Schools of Philadelphia.

In view of all this, and especially taking into consideration President Roosevelt's expressed appreciation of the services of Dr. Brumbaugh in 1902 and his desire to have Dr. Brumbaugh resume his duties in Porto Rico, does it not seem strange that Colonel Roosevelt should come to Pennsylvania in 1914 and conduct a campaign of abuse against the man to whose value he gave testimony by requesting him to resume an important position under the Federal Government.

What can Colonel Roosevelt have against Dr. Brumbaugh? Dr. Brumbaugh is a clean, upright Public Servant, who has endeared himself to the hearts of the Men, Women and Children of Pennsylvania, for whose character and capability Roosevelt himself once stood sponsor.

WHY GOOD BLOOD IS RED Why are we continually being told that good blood must be bright red? What has color to do with the quality? Just this. The oxygen in the air is the great supporter of animal life. The business of the blood is to take oxygen from the air (which it meets in the lungs and deliver it to the tissues of the body. When the blood, filled with life-sustaining oxygen, is sent out by the heart it is bright red. When it returns, filled with impurities, and deprived of its oxygen, it is dark.

From this it is clear that there are two prime requisites of health, pure air and bright red blood—the pure air to furnish the oxygen, the rich blood to carry it where it is needed. Dr. Williams' Pink Pills makes the blood rich and red because they increase its power to carry oxygen, actually making it so much more able to carry increased life and strength to every organ of the body. Try these tonic pills and note the increased color in cheeks and lips; see how your nerves become steadier, your appetite better, your digestion stronger, your step quicker, your troubles lighter.

"Building Up the Blood" is a handy little book to have. It is free on request out by the heart it is bright red.
