## "Dad" Phillips Tells of First Glove in Use

Special to The Telegraph

San Francisco, Nov. 4.—"Dad" Phillips, who is employed as binder by the Leland-Standford University "Press." claims to have seen the first finger mitt ever used in a baseball game. Over 40 years ago "Dad" says he played on the same team with A. G. Spalding at Rockford, Ill., and tells of the origin of the mitt as follows:

"In one of the games that our Rockford squad played we were attracted by the sound of the ball as it clapped into the hands of the man on first base for our opponents. Of

it clapped into the hands of the man on first base for our opponents. Of course, none of us wore mitts in those days, and we never thought such a thing would be practical. But this man on first base always caught the ball with a loud pop, and several of us noticed it, though we could see nothing unusual about his hands.

"However, after he caught the ball each time, he pressed something into his left hand. After the game Spalding and I went over to see what he had in his hand. After some protest he showed us. It was nothing but a piece of bent metal around which he had injured his hand, and did not want to be kept out of the game, which was for the championship of the state. So he had made this mitt."

In one week the English title holder is meeting two tough opponents, and if he can clean up with White in the manner which he has done with Ad Wolgast last Monday night and the veteran, Matty Baldwin, a week ago, he will certainly be classed as a real lightweight champion.
