LULL BELIEVED TO BE PRELUDE TO BIG BATTLE IN WESTERN THEATER

Russian Invasion of Turkish Territory From Caucasus Has Been Halted; Austrian Advances Are Being Carried on With Further Success; Soldiers Are Suffering Dreadful Hardships in Water-soaked Trenches Along Battle Front

Storms and floods, the enormous loss of life and the strain of incessant fighting apparently have taxed to the limit of human endurance the opposing forces facing each other in the death struggle in Belgium and Northern France. Another lull has come in the great battle, which presumably is but the prelude to one more desperate effort. To-day's reports from the front indicate that assaults by infantry and cavalry have been abandoned for the moment, except for minor engagements, and that only the artillery is continuing operations with vigor undiminished. Meanwhile the fighting continues on many other fields. The Russian invasion of Turkish territory from Caucasus has been halted. The great campaign of the Russians against the Austro-German armies proceeds with varying fortunes in different localities, with chief interest now centering in the German offensive movement against the Russian center. In Serbia the Austrian advance is being carried on according to Vienna reports, with further success. Accounts of the fighting in Belgium, official and otherwise, dwell upon the frightful hardships which the men in the water soaked trenches are called upon to endure, and the great loss of life. Regarding this latter phase, official reports have little to say, although private accounts of the extent of the slaughter must be accepted with reserve it is evident that both the Germans and their foes have suffered greatly. One such report comes from a British correspondent who estimates the German casualties in the last four days at 100,000. If similar reports from the east are to be credited the slaughter in that territory is no less terrible. A letter written by a Galician priest describes a grave more than four miles long. In it, he says the letter, 40,000 Austrians, the dead from one day's fighting were buried.
