Methodist Church Pastor Organizes School For Benefit of Foreign Born

REV. J. H. ROYER

A new force for the development of a more desirable citizenship has been started. It is the newly-organized "foreign" school, conducted by the First Methodist Church, of Steelton.

At the head of the new school, which is expected to do great things towards the improvement of the conditions of the foreign-born residents of Steelton, is the Rev. J. H. Royer. Although pastor of the First Methodist Church only a few months, the Rev. Mr. Royer has already become cognizant of one of the greatest impediments to good citizenship among the foreign-born citizens of the borough—their inability to speak, or properly understand the English language.

Finding that there are nearly 4,000 men, women and children of foreign birth in Steelton, of which a large majority are unable to read or write, the Rev. Mr. Royer began to study various methods possible to change these conditions. He decided upon the plan adopted by the Young Men's Christian Association, and used extensively among foreigners in the coal regions. Appealing for and to the Rev. Dr. William G. Bennett, of Pottsville, superintendent of the Anthracite Mission, Dr. Royer began to organize his school. Dr. Bennett has a wide experience in organizing mission study classes as these foreign schools.

Foreigners Eager to Learn.—Circulars were written in the Italian, German, Hungarian and Croatian languages and distributed throughout the foreign section. These circulars explained the plan and invited the foreigners to visit the First Methodist Church, Monday evening, November 9.

When Monday evening came there were thirty-eight foreigners assembled in the social room of the church. With the assistance of Dr. Bennett and members of the Epworth League, the Rev. Mr. Royer outlined the course of studies. There will be ten lessons in elementary English. After this those pupils who are so fitted will be given additional lessons in English grammar. The second class was held last Monday evening. So delighted were the students of the week before with their progress, that the class was increased through their efforts to fifty-two members. This number was divided as follows: Italians, 22; Hungarians, 5; Croatians, 10; Germans, 3; and Bulgarians, 2.

Middletown Car Company Gets Adverse Decision

In denying the application of the Middletown Car Company for a "fabrication in transit" rate, the Interstate Commerce Commission, at Washington, D. C., yesterday, rendered a decision affecting virtually every steel plant. Railroad serving steel companies will also be affected by the ruling of the commission. The Middletown plant is on the Pennsylvania Railroad, and is 22 1/2 miles east of Pittsburgh.

The car company in its application to the commission, pointed out that the rate on the steel unfurnaces of cars shipped to it from Pittsburgh was 15 cents a hundred pounds. Then the rate on the same cars after the work upon them by the car company, of Curtis Bay, Baltimore, was 9 cents a hundred more, making the total 24 cents, while the through rate from Pittsburgh to Curtis Bay was only 14 1/2 cents.

The commission held that the company should do as it desired, could make the frames at its own plant, and therefore, was not at a disadvantage by having to bring the frames from Pittsburgh, and then reship them, after working upon them, to Baltimore.

Inspector's Nose Broken.—Jacob Hoak, 1343 Vernon street, car inspector on the Pennsylvania Railroad, sustained a suspected fracture of his nose when a bar slipped and struck him while he was repairing the car. He was treated at the Harrisburg Hospital this morning.

Hope to Renew Advance

Notwithstanding the extent of the flooded area the invaders hope to renew their advance. Large numbers of engineers are being sent to the front and German ingenuity is to be put to the test to provide a scientific method of crossing the inundated country. The outcome of yesterday's naval battle in the Black Sea is still in doubt. No fresh information was received to reconcile the conflicting claims of Russia and Turkey, each of whom asserted that a hostile battleship had been damaged seriously in the engagement.

CITY'S CHRISTMAS TREE TO BE BIGGER

Larger Evergreen Than That of Last Year to Be Erected at Front and Market Sts.

Harrisburg's second municipal Christmas tree was made a certainty to-day when the committee in charge met and discussed plans for the Yuletide event in the office of Mayor John K. Royal, who presided. Clarence O. Backenstoss, secretary to the Mayor, was made secretary.

The tree will again be erected at Front and Market streets. It will be much larger than that of last year. Robert W. Hoy, of the Harrisburg Light and Power Company, will look after the procuring of a suitable tree and will also arrange for the illumination of the tree. The music this year will be in the charge of Professor Edwin G. Rose, instructor of music in the Harrisburg public schools, and Professor E. J. Decey, of the Harrisburg Conservatory of Music. Christmas carols and patriotic songs will be a part of the program. A chorus of 1,000 voices, including students from the Central and Tech high schools, will sing. There will also be a series of moving pictures and stereopticon views, showing Yuletide scenes and subjects.

Mayor John K. Royal was named as the committee to arrange for a band. The chorus will meet at a certain point and with the band will march to Front and Market streets.

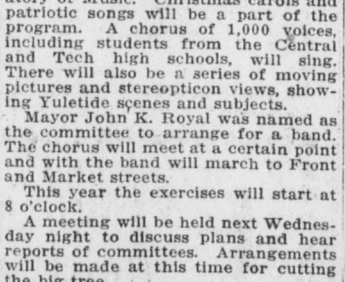

This year the exercises will start at 8 o'clock.

A meeting will be held next Wednesday night to discuss plans and hear reports of committees. Arrangements will be made at this time for cutting the big tree.

PLATE SPEEDS IN PHOTOGRAPHY Knowledge of comparative plate speeds is of considerable importance to the successful photographer. They are rated in various ways, one of the most common and satisfactory being by a series of numbers invented by Hurter and Driffield of England, and known as the H. & D. numbers. Thus Eastman and Ansco films are said to have a speed of H. & D. 250, while Cramer Medium Isochromatic plates are listed at H. & D. 150. Under another system the same films are rated at 324 and the slower plates at 254. Some such system is imperative with every exposure meter, to be described below. The numbers to be used with the meter are supplied with it, and they indicate the relative speeds quite satisfactorily.—Outing
