To you think so? Look at the "woman at the next table, and the man with her."

Helen was longing to take another look at the door, but she dared not. The woman at the next table was a girl too; she didn't look more than nineteen or twenty. She was dressed in the height of fashion with a monskey hat perched ridiculously on one side of her head and fish hook curls plastered against her smooth cheeks. Her coat was flung carefully over the back of her chair and her thin chiffs.

West Fairview, Pa., Jan. 5.—Union evangelistic services conducted by the United Brethren and Methodist congregations, which began on New Year's Eve with a watch night services, grow more interesting. The services will be held in the United Brethren Church until Wednesday evening. Beginning with Thursday evening. Beginning with Thursday evening and continuing for one week the services will be held in the United and adughter, Mrs. E. E. Bickle, of the look at the door, but she dared not many the most of the felt the room with a month with her, then she fought off the faintness and smiled brilliantly at Mrs. Stevens.

## CONVENIENT FROCK

with Skirt and Blouse that are Buttened Together.

SMART AND

By MAY MANTON

Every mother will recognize the advantages of this dress. Since the blouse and skirt are finished separately and buttoned together, washable material is easier to launder than when the entire garment is made in one and, if liked, two blouses can be made for one skirt since blouses soil more readily. Here colored and white galatea are combined effectively. There are various other cotton materials heavy enough for winter wear that are appropriate and many combinations can be made. Striped material for the skirt and trimming with plain white for the blouse is pretty. If something lighter is wanted, éponge could be used with one of the smart plaids for the skirt and trimming and white linen or cotton crépe for the blouse. The skirt is in four gores, giving a box plaited effect at front and back. The blouse is a simple one with set-in sleeves. Both are closed at the front so that the frock is an easy one for the girl herself to adjust.

For the 8 year size, the blouse will require  $2\frac{1}{4}$  yds. of material 27,  $1\frac{1}{2}$  yds. 36 or 44 in. wide; the skirt and trimming 2 yds. 27,  $1\frac{1}{2}$  yds. 36 or 44 in. wide.

The May Manton pattern of the dress 8274-A is cut in sizes from 6 to 10 years of age. It will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

READINGS ON GERMANY

A FEW HOURS

A FEW HOURS

WITHOUT QUINNE

Special to The Telegraph

Annville, Pa., Jan. 5. — Annville

Reading Circle was entertained on

Monday evening at the home of Mrs.

C. P. Saylor. A special program was

arranged by the committee, consisting of Mrs. William F. DeLong, Mrs.

J. W. Biever, and Mrs. G. P. Spangler.

The readings of the circle for the

year are on Germany and the program

on Monday consisted of stereopticon
views of Germany, its principal cities,
places of interest, noted buildings and
famous works of art.

Don't stay stuffed-up!
Quit blowing and snuffling: A dose of "Pape's Cold Compound" taken every two hours until three doses are taken will end grippe misery and break up a severe cold either in the head, chest, body or limbs.
It promptly opens clogged-up nostrils and air passages; stops nasty discharge or nose running; relieves sick headache, duliness, feverishness, sore throat, sneezing, soreness and stiffness.

"Pape's Cold Compound" is a stiffness.

Commissioner Dixon Tells What Antitoxin Has Accomplished in This State

Diphtheria antitoxin, which the Commonwealth of Pennsylvania gives free to people unable to pay for it, has been the means of saving many lives and will probably save more, says Commissioner of Health Samuel G. Dixon. The doctor in his weekly talk discusses the antitoxin in a very clear and forceful way. He

"There are few absolute specific "There are few absolute specimes known to medical science. In the majority of aiments to which mankind is heir the wise physician is he who studies his case with the idea of climinating those things which hamper the natural functions and gives nature every chance to restore her balance.

the satural folicities and folicities a

of death following epidemics of this disease.

"Without the use of antitoxin the death rate from this disease often exceeds 40 per cent. When diphtheria antitoxin is used in sufficient quantities immediately after the onset of the disease prompt recovery follows with few exceptions. Unfortunately, one of the first evidences of diphtheria is sore throat, which to parents may appear to be only a slight cold. If this is really the onset of diphtheria, the disease develops within a short time with terrifying rapidity into the more advanced stages. For this reason every case of sore throat among children should be watched with the greatest of care and wherever possible early medical attention should be secured.

Records of the State Department these themselved to the state preparation.

greatest of care and wherever possible early medical attention should be secured.

"Records of the State Department of Health which have been compiled show the results of the treatment of thousands of cases. They prove that the deaths from this disease, after the treatment with antitoxin, occur when there is delay in administering it.

"From a death rate of zero on the first day it increases to 5 per cent, on the second day, 12½ per cent, on the third day, 22 per cent, on the fifth day. Antitoxin may be administered in enormous doses without danger. Cases are on record in the department where 185,000 units have been required to effect a cure in an individual case.

"Diphtheria antitoxin is not alone a curative agent, but is also a preventive, and should be used in damunizing doses to prevent the spread of the discase among those who have been exposed to it.

"With this wonderful specific at the command of the medical profession there should be few deaths from diphtheria. Those which occur in the great majority of cases are due to the fact that the early symptoms have been overlooked or neglected by parents and the resulting delay in securing prompt antitoxin treatment."

### Sole and Heel Look at the picture.

The extra thick sole and heel means more life for these rubbers; it means that these rubbers give more wear than ordinary rubbers.

These Hub-Mark Storm Rubbers with Service Heel or Rolled Edge are what you should insist upon from your dealer. Accept no others. Made also in low cut.

No other kind can be more satisfactory for style, fit and wear.

Look for the Hub-Mark on all kinds and styles of Rubber Footwear for Men, Women, Boys and Girls.

Note this:—You can rely on anything you buy from dealers who sell Hub-Mark Rubber Footwear.

They are dependable merchants. Boston Rubber Shoe Company Malden, Mass.

#### **Acid Stomachs Are** Dangerous

Common Sense Advice by a Distinguished Specialist.

"Acid" stomachs are dangerous because acid irritates and infiames the delicate lining of the stomach, thus hindering and preventing the proper stomach and leading to stomach trouble from which people suffer. Ordinary medicines and medicinary for they leave the source of the trongs, at the acid in the stomach, as dangerous as ever. The acid must be neutralized, and its formation prevented, and the best thing for this purpose is a teasimple antacid, taken in a little warm or cold water after eating, which nor only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause distress may be eaten with impunity if the meal is followed with a little bisurated magnesia, which can be obtained from any drug-quist, and should always be kept handy. Common Sense Advice by a Distin-guished Specialist.
