A Demonstration of a Sink Protecting Dish Pan In the Basement

This is the age of efficiency—a time when one article is designed to do the work of many others. It is of interest to note in this connection that the Amico Sink Protecting Dish Pan is not only a dish pan with an accommodating shape but a dish drainer and sink strainer as well.

The Amico dishpan is made with an outlet in the center of the pan exactly like a bath tub or wash stand and under the outlet is a little strainer drawer of rustless galvanized mesh which will catch all heavy grease and refuse from the dish water. This practical invention is now being demonstrated in the basement.
