Dr. Hibben recommends that particularly in football the captain should be the sole responsible person so that in the critical situations he and histeam will rise to the occasion and win or lose with honor." Says President Hibben: "It is quite absurd, when one comes to think of it, that the control of the team in all preliminary games should be in the hands of a body or lines when the play is on. After all it is an undergraduate affair and the game should be planned and played by undergraduates."

Princeton's president concludes: "If we can release our undergraduates from the unnatural domination of their sports by graduate coaches and from the confusion of many minds and many voices in the direction of their activities we will simplify the whole athletic situation and liberate intercollegiate sport."

After bringing his total run to 54 he fell down on a side cushion carom shot.
