## DON'T WASH YOUR HAIR WITH SOAP

When you wash your hair, don't use soap. Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle. The best thing to use is just plain mulled coconut oil. For this is pure and entirely greaseless. It's very cheap, and beats soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months. Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is left soft, fresh, looking bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.

The musical numbers are the song hits of the theatrical season, combined with dances given by different groups, forming a combination superior to the average amateur performance. The play will be given two evenings, January 25-26, at the Majestic, by a cast of 12 people, directed by the Ladies' Auxiliaries of the Polytechnic Hospital, for the purpose of furnishing new equipment which is much needed.
