Dives, Pomeroy & Stewart

A February Furniture Sale With a Purpose

COMMENCES MONDAY MORNING

A Notable Event Founded on a Co-operative Principle Between Great Makers and Ourselves

Furniture is much like many other kinds of merchandise--in that there is so much of it that is hidden to the purchaser--the grades of the lumber, the fitting of the joints, the character of the inlays and the reason for its particular kind of style--points that make the sum total of satisfaction or dissatisfaction in desirability and appearance.

In their early years many persons do not appreciate how much a careful selection of furniture may mean to them, the regrets coming later as their knowledge of the refinements of furniture grows.

You live with your furniture, and through it is reflected much of your character. Your furniture, in turn, reflects your judgment and taste, and, to a great extent, it indicates your furniture education.

Each of our Furniture Sales, the one in February and the other in August, has always exceeded its predecessor in the actual total value of the stocks; and this year sets a still higher mark by several thousands of dollars.

In this Furniture Sale will be found many examples of correct pieces, safely bought, that may be just as safely bought by you with the assurance of a life-time of satisfaction. This is the only kind of furniture worthy the name and the only kind that ought to go into your home, and beginning Monday

Prices Will Be So Uncommonly Attractive That Your Inspection Will Be Merited

STORY RITEN'

By the Messenger Boy

These tales want to be written for women, as stated in the beginning, but after consideration the editor said there ought to be one a week about a lady hero, because heroines in fiction play important parts and the public wouldn't read stories if they

wasn't made up with women in em. As the girls has been neglected subjects, so far, to-day will endeavor to make up and have a pair of twins for heroines. They both looked alike, and talked alike, and dressed alike, but one had a mean temper and nobody liked her and she couldn't get a fellow. There was two fellows liked the nice twin and had a contest to get her. The first fellow had got a engagement with the twin he liked to go to a surprise party with refreshments--I want say whether the fellow was me--mobby it was and mobby it wasn't, but that

don't matter. The mean-temper twin didn't get invited to the party. It was the first time this fellow ever took her out after dark and he was excited about it and as happy as could be to think she was going with him, considered the opposition. She was all ready when he come to the door and they started for the party. They all decorated up in the parlor and they all had a dicens of a good time playin blind-man's bluff and other games. There was such a crowd there you couldn't hardly see who was there and who wasn't.

It was durin some kind of a fool kissin game, the fellow got mad by seein some other guy tryin to kiss the twin. But then it was all right the next second when the twin slapped his face for tryin. When the fellow took her a glass of water afterward and laffed at her slappin the fresh gink, she up and got mad at him too; and he see then he had the mean twin instead of the one he liked. He was so mad he went straight home to see where she was and he found the other sooter there playin checkers, it bein all a put-up game to

fool him, she havin got tired of his at-tenshuns and sent her mean twin sister as a substutshun to the party. The fellow went away mad and never went there again. MOST ANYTHING CAN BE DONE NOWADAYS BY USING ELECTRICITY. About 3000 electrical vehicles are in use in Europe. The United States leads in the use of the electric auto-

mobile. The government is erecting a new radio station at San Diego, Cal. An electrical device has been invented to "cure" logs and lumber to prevent sap strains. An instantaneous electric water heater is now made, which gives hot water on demand. By turning the faucet to the left, hot water is obtained and by turning it to the right, cold water flows.

An electric floor scrubber will clean 8000 sq. ft. of floor an hour. The scrubber consists of a motor-driven brush and tanks for clean and dirty water. Electricity is being used as a source of heat and power in large cannery factories. The superdreadnaught "California" to be built at New York navy yard, will be the first American battleship to be driven by electric motors.
