SOAP IS BAD SOAP FOR THE HAIR

Soap should be used very sparingly. If at all, if you want to keep your hair looking its natural, nice, moist and prepared shampoo, most contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is just ordinary mild, coconut oil (which is pure and greaseless), is cheaper and better than soap or anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage.

You can get mulsified coconut oil at any pharmacy, and a few ounces will supply every member of the family for months.

ACID IN STOMACH SOURS THE FOOD

Says Excess of Hydrochloric Acid Is Cause of Indigestion

A well-known authority states that stomach trouble and indigestion is nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food fermentation, then our meals sour like garbage in a can, forming acid fluids and gases which inflate the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulence, water-brash, or nausea.

He tells us to lay aside all digestive aids and instead, get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast while it is effervescent, and furthermore, to continue this for one week. While relief follows the first dose, it is important to neutralize the acidity, remove the acid-making mass, start the liver, stimulate the kidneys and thus promote a free flow of pure digestive juices. Jad Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salt is used by thousands of people for stomach trouble with excellent results.

REVISE SCHEDULE ON DEMURRAGE CHARGES

Raise Daily Rates on Cars Held Beyond Five Days; Favor Shippers

Division and local freight agents of the Pennsylvania and Reading railroads announce a revised schedule on demurrage charges on refrigerator cars in which perishable freight is shipped. The new schedule, it is said, affects all railroads in the country.

By raising the daily demurrage charge when the car is held beyond five days, the railroads expect to add greatly to the service offered shippers and at the same time greatly increase the earning power of their equipment. The new schedule of demurrage charges on these classes of equipment allows shippers two days' free use of cars; following which there is a charge of \$1 a day for the third, fourth and fifth days, and \$3 a day for the sixth, seventh and eighth day that equipment is held. For the ninth day and for each additional day after that time the daily demurrage charge is \$5.

The demurrage regulation governing the class of equipment which have been in effect have allowed two days' free use of the cars and a uniform charge of \$1 for each additional day. The aim of the new regulations as set forth by the railroads in announcing them to shippers is to facilitate the handling of shipments requiring refrigerator car service.
