ISLAND COAL WHARF CO'S DOUBLE GAIN

Harrisburg to Benefit Financially—Unightly Conditions on Wall Eliminated

"Not only will the city be the gainer financially by allowing the electric light company the use of sufficient ground on the island for the erection of its coal wharf, but it thinks the problem of unsightly conditions along the river wall at Front and Market streets due to the present landing wharf will be solved by the passage of the ordinance."

City Commissioner Harry F. Bowman to-day summed up his position relative to the ordinance offered last Tuesday which grants the Harrisburg Light and Power company the use of a plot 100 by 100 feet on the eastern side of the island for the erection of concrete loading wharf and hopper in return for 1200 tons of river coal each year for the filtration plant. This amount of coal will be all that will be needed at the plant. By erecting its wharf on the island the company's landing stage on the river will no longer be necessary. The measure will come before council for final action Tuesday.

Water contains 40 P. C. Less Alum. Commissioner Bowman's statement was in reply to an anonymous communication in a morning newspaper which the superintendent declared is the new way, the sure, simple, painless way. Try it for corns, callouses, warts and bunions.

COMING AND GOING AT THE POORHOUSE

Alcohol Jack Saw Stonecrusher; Now He's Somewhere in the Hills, and Running

To-day the almshouse stonecrusher stonily crushed the hopes of a comfortable winter berth for at least one "regular" who in years gone by has grown to look upon winter boarding at Dauphin county's expense, as his inalienable right.

The records of the poor board office give his name merely as "Alcohol Jack." This is not sarcasm. In brief this is the story of the coming and going of "Jack."

Several days ago he made his regular application for admission to the almshouse, was granted the privilege, took up his two bundles—exterior and interior—and started. He got a glimpse of the almshouse he broke his gait to a weary plod over the hills to the poorhouse.

By to-day he could be called plain "Jack" without offense. Steward S. F. Barber accordingly told him to "walk over there," pointing generally to the east, where he was to "see a man."

"Jack," according to Mr. Barber, was to tell the man that he had been sent by the steward. "Jack" climbed to the top of a hill. Nestling in the valley was the stonecrusher.

One glimpse was sufficient. "Alcohol Jack" increased his gait to a sprightly gallop—over the hills from the poorhouse.

Interstate Commerce Commission Ready to Permit New Charges

Washington, Feb. 11.—To meet new traffic conditions which have arisen with the opening of the Panama Canal the Interstate Commerce Commission to-day has authorized the railroads to establish certain commodity rates from Eastern points to Pacific coast terminals lower than those to intermediate points in intermountain territory.

The conclusion of the commission's order, which brings into prominent notice the revolutionary effect of the Panama Canal on transcontinental transportation, was announced at the commission's headquarters as follows:

"To secure any considerable percentage of this coast to coast traffic rates on many commodities must be established at rates four or five per cent lower than those now existing. As we view it, the Panama Canal is to be one of the agencies of transportation between the East and the West, but not necessarily the sole carrier. If the railroads are able to make such rates from the Atlantic seaboard to the Pacific coast as will hold to their lines some portion of this coast traffic, they are permitted to do so. The acceptance of this traffic will add something to their net revenues and to that extent decrease the net losses of the railroads. It will also give the shippers at the coast points the benefits of an additional and competitive service."
