'TIZ"--A JOY TO

"TIZ" for aching, burning, puffed-up feet and corns or callouses.

The Philadelphia and Reading Rail-Way Company has equipped its freight station in Harrisburg with Kron automatic scales. These scales are the very latest thing for freight and warehouse use and are operated with success in Philadelphia and New York. The rapid growth of the Reading's freight business at this point led the company to install them here.

The scales are springless and insure absolute correctness of weight. All that is necessary is to place the parcel to be weighed on the platform and the hand automatically registers correct weight without attention or shifting of levers by the weigher. The scales in the Tenth street station have been removed to the driveway side, which will also aid in the rapid handying of freight which the new scales so much facilitate. swollen feet, smelling feet, tired feet.
Good-bye corns, callouses, bunions

Walk in and Sit Light

Without the formality of seeing the owner and arranging such a little detail as rental a family of foreigners moved their household goods into a vacant house at 771 South Third street. For several weeks everything was rosy and every comfort of the home was enjoyed until Christian Hess, the owner, happened along on an inspection trip.

Hess says he inquired as to the identity of the tenant and whether or not they pald rent.

"Oh, no! What's the use of paying rent?" or words to that effect, was the reply, he says.

Hess then ordered the family out.
They refused to budge, he declared to Squire Gardner to-day.

Detective Irvin N. Durnbaugh was asked to try his hand in ejecting the family. He succeeded after landing two of the party in jail. The remainder of the outfit moved suddenly. The two men arrested will be given a hearing before Squire Gardner this evening.

An unconfirmed rumor went the rounds in business circles in Attoona, yesterday, to the effect that the Pennsylvania Railroad Company had purchased the plant and equipment of the H. S. Kerbaugh property, at Bellwood. At the office of P. H. Faris, real estate agent for the Pennsylvania railroad, it was announced that nothing was known of the deal, and that if negotiations were pending, they were being carried on from Philadelphia.

The Kerbaugh plant, some time since, suspended operations in a number of the departments. The firm had large shops where equipment for railroad construction work was manufactured, and it is generally believed here that the report of the sale to the Pennsy is authentic.

Bill For a Bureau of Municipal Research to Be Given Attention by Session

Representatives of the third class cities of the State, who are planning to appear before the committees of the Legislature in the interest of legislation affecting that grade of

the interest of legislation affecting that grade of municipalities, will probably ask that some steps be taken to provide for a department of the State government to look after the interests of cities, to gather information and compile statistics, as well as enable the officers to keep in touch with what is being done in other places. This has been suggested for some years by the League of Third Class Cities.

A bill having a similar object is in the Senate, calling for the establishment of a municipal information bureau in the State Legislative Reference Eureau. This is to be in charge of a chief, who is to study the ordinances and procedure in cities and publish reports thereon and also to draft ordinances and establish forms for uniform procedure.
