20TH ANNIVERSARY OF CHORAL SOCIETY

city will celebrate its twentieth anniversary. It was organized in 1895 and has continued its activities from that date. For eighteen years under the direction of Dr. W. W. Gilchrist of Philadelphia, who two years ago was compelled to resign owing to ill health, since that date the conductor has been Dr. J. Fred Wolfe, of Bethlehem, noted for his able work in connection with the Bach choir and Bach festival. The society numbers 250 and has been rehearsing all winter Handel's magnificent oratorio "Samson," most tuneful and immensely dramatic. Dr. Wolfe is delighted with the work of the society, and, on April 29, expects to surpass last year's concert. This is setting a high standard. In the afternoon, the Russian Symphony Orchestra of New York, which captivated its audience last year, will give an orchestral concert. This orchestra comprises forty musicians under the able conductorship of Mr. Mostel Altschuler. The program to be announced later, includes many favorite selections and several fine solos. The afternoon concert will begin at 3 o'clock so as to enable teachers and pupils of the public schools to attend. The choral concert will begin at 8:15 in the evening, when the Choral Society will be assisted by the Russian Symphony Orchestra and the following distinguished New York soloists: Miss Marie Stoddart, soprano; Miss Marie Morrissey, contralto; George Harris, Jr., tenor, and Wilfred Glenn, bass. Tickets may now be had from any member of the society; at Sigler's music store, 22 North Second street, and the Central book store, 329 Market street. All indications point to a most successful anniversary.

Honolulu, April 15.—The superstructure of the submarine P-4 is caved in and the hull is filled with water, according to a report made by Chief Gunner's Mate George D. Stillson, who late yesterday descended to the ocean floor and examined the wreck after Frank Crilly, a diver, had located the submarine earlier in the day. Stillson who made a partial survey of the hull, reported that, aside from the damage to the superstructure, he was unable to find any other holes and that the top plates were not crushed in. The submarine is lying at a depth of 288 feet.
