b) a blood trouble. Most people, uninstructed in this mem-braneous disease, treat their nose and throat as if catarrh was a local trouble. It is not so. To treat catarrh it is nec-essary to go into the stomach, the liver, the lungs, the kidneys and all the vital organs of the body. And it is S. S. S. that at once enters the entire blood cir-culation, all the organs of the body, all the mucous surfaces and becomes a dominant factor for renewed health. It is a simple method when you figure it out. Catarrh is plainly an inflamma-tion of the mucous membranes. And there is in S. S. Scartain ingre-dients which cause these mucous sur-faces to change or convert their secre-tions into a substance for easy elim-ination. A special book on this subject will be mailed to all who write to The swift Specific Co., 110 Swift Bldg.. At-lanta, Ga. Catarrh is very often the result of me other blood trouble, some germ that gets into the blood and multiplies beyond the control of nature. S. S. Is its the remdy. Going to the Exposition? Don't **Miss Colorado Scenery**

No one can be indifferent to the beauty and grandeur of the Colorado Rocky Mountain scenery, and visitors to the California Expositions should make a point of seeing it. Also Den-ver, Colorado Springs, Pueblo, the Royal Gorge, and Salt Lake City. Now there's no extra charge for all this if you go via the Eurlington Route (C., B. & Q.), because it so happens that the through service of that line has been planned so that you pass all of these points by daylight, and you can view from the train a panorama of mountain scenery that lis as cele-brated as any in the world. Surely on your way you will not miss this opportunity and I would like to send you free some pictures, maps and printed matter, not only of the Colorado wonders, but also of Glacier Park or Yellowstone Park, which, by all means, you should visit on the re-

Notaseme Stone Lined **Refrigerators Have** Stood the Fire Test

The fire that destroyed the Montgomery warehouse has more than proved everything we have heretofore claimed for Notaseme re-frigerators — it has established in many minds, the necessity of securing a refrigerator that will repay the purchaser in the amount of ice saved.

These refrigerators, which cases are of hard ash, prov-ed virtually fire-proof, as not once did the flames penetrate those six walls of any in that entire carload stored there at the time of the fire.

By this, can easily be seen how difficult 'twould be for ordinary summer heat to enter through six walls and an air-tight door. Consider the ice that can be saved. The stone lining is seamless with round corners

which makes it absolutely sanitary. Refrigerators taken from the fire, now on display in
