New Ricket Case.—Paul E. Woll, of Philadelphia, has filed with the Public Service Commission a complaint against the Philadelphia and Reading Railway Company alleging that there is discrimination both in regard to the service and the rates against the Fern Rock passengers on the Third and Berks street line. The complaint alleges that the railroad company, since the discontinuance of the fity-trip tickets on the Third and Berks street line, issue a sixty-trip monthly ticket. There is but one train from Fern Rock daily to the terminal on which such a sixty-trip monthly ticket can be used and the complaint says that inasmuch as the other lines of this road afford adequate service and reasonable rates, the branch complained of should be put on the same basis by compelling the company to offer either an extra train at evening to enable the public to make use of such a sixty-trip ticket or to put into effect a practical rate for the morning train.

Syracuse, N. Y., May \$.—That William Barnes told him Charles F. Murphy of Tammany Hall, had asked for help in 1911 to defeat a direct primaries bill in the legislature and that the then chairman of the Republican State committee had answered he would refuse the aid asked and had remarked he would not pull the Tammany leaders' "chestnuts from the fire" was the sworn testimony given in the Supreme Court here to-day by Walter T. Arndt, formerly Albany correspondent of a New York newspaper.

Mr. Arndt, was one of the several witnesses who were placed upon the stand by the defense. Among them was Edward T. Platt, son of the late Thomas C. Platt, former United States senator and described in previous testimony as the "easy boss." Mr. Platt. produced several bundles of musty letters taken from the files kept by his father from 1899 to 1909.

George H. Dickinson, of Washington, another former correspondent of a newspaper in Albany, testified regarding a conversation he had with Mr. Barnes in which the subject of Governor Hughes and race track legislation was freely discussed.

Mr. Platt was called after Michael Dolan, general manager of the Argus Company, of Albany, had testified that his company paid 15 per cent. of all city contracts to the Journal Company, He said he had brought letters bearing dates between 1899 and 1909 that passed between 1890 and 1909 that passed between 1800 and 1900 that passed between 1800 and 1900 that p

To Cut Road Bill

It is probable that the highway bill, carrying \$8,500,000 will be cut down to about \$6,000,000, the revenue from automobile licenses being included. The cost of the Highway department administration for two years is estimated at \$907,000, which is in the general appropriation bill and a separate item. To get the six million it is believed that revenue raisers must be

Considerable time was spent discussing the situation in regard to the insane. The Governor took up this matter with the State Board of Public Charities last week and is interested in getting the excess insane taken care of. After the conference Chairman Woodward said: "If the situation is as bad as represented, it is up to the counties to provide for the insane. The State allows \$2 per capita per week fo rthe maintenance and I think the counties should provide quarters. The counties could help amazingly by giving accommodations while the State is building and the time when the State will take care of all the insane will be brought nearer. New York, May 3.—That a remarkable operation, involving the sewing up of a wound in a man's heart, had been successfully performed on April 20 at the Beth Israel Hospital, became known to-day when it was announced that the injured man. Israel Zliff, probably would be able to leave the hospital in a few days.

Zliff, a cocoanut peddler, was in the habit of slicing cocoanuts with a big knife. On April 20 his knife slipped and cut through his left breast. Zliff's clothes stayed the blood at first and he managed to reach the hospital unaided. Dr. Alfred A. Schwartz's examination revealed a deep wound at least an inch and a half long.

The flow of blood had to be stopped in the first place and the patient anesthetized for the operation. But if the chest were cut open to check the hemorrhage the lungs would collapse from the air pressure on the outside, so air had in be pumped in until the inflation was sufficient to resist the pressure from without. The process was combined with the application of the anesthetic by the method known as intertrachial anesthesia.
