THE PRICE OF SUCCESS Many people pay a terrible price for success—sacrifice for it, health and happiness. Neurasthenia, a typically American disease, is due to worry over the struggle for success more than to any other one thing.
Neurasthenia is a condition of nervous exhaustion in which the system fails to recuperate after unusual demands upon its nervous energy. Its symptoms are: nervousness, irritability, a disposition to worry over trifles, headache, possibly nausea.
The treatment is one of nutrition of the nerve cells, requiring a nonalcoholic tonic. As the nerves get their nourishment from the blood, the treatment must be directed towards building up the blood. Dr. Williams' Pink Pills act directly on the blood and with proper regulation of the diet have proved of the greatest benefit in many cases of neurasthenia. A tendency to anemia, or bloodlessness, shown by most neurasthenic patients, is also corrected by these tonic pills. Your own druggist sells Dr. Williams' Pink Pills. Begin the treatment to-day before your condition becomes chronic.
Two useful books, "Diseases of the Nervous System" and "What to Eat and How to Eat," will be sent free by the Dr. Williams' Medicine Co., Schenectady, N. Y., if you mention this paper.—Advertisement.

Acid Stomachs Are Dangerous Common Sense Advice by a Distinguished Specialist "Acid" stomachs are dangerous because acid irritates and inflames the delicate lining of the stomach, thus hindering and preventing the proper action of the stomach, and leading to probably nine-tenths of the cases of stomach trouble from which people suffer. Ordinary medicines and medicinal treatments are useless in such cases, for they leave the source of the trouble, the acid in the stomach, as dangerous as ever. The acid must be neutralized, and its formation prevented, and the best thing for this purpose is a teaspoonful of bisaturated magnesia, a simple antacid, taken in a little warm or cold water after eating, which not only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause distress may be eaten with impunity if the meal is followed with a little bisaturated magnesia, which can be obtained from any druggist, and should always be kept handy.—Advertisement.
