WOULDN'T YOU LIKE TO STROLL ALONG THIS PLAZA?

How City Commissioner Harry F. Bowman's proposed plan for constructing a concrete plaza fronting on the river in the rear of the city pumping station, should look when completed is shown in the accompanying sketch. The plan was prepared some months ago by engineers of the Board of Public Works. The structure will cost about \$2,500, will rise to about eighteen feet above the granolithic walk and will be 240 feet long. A 3 1/2-foot concrete coping will serve as a balustrade. Work will be started on the construction of the plaza within a day or two by the Stucker Brothers Construction Company in connection with the laying of the granolithic sidewalk along the wall.

THE GODFREY-ANGELL ENGAGEMENT ANNOUNCED

consist of a wall that will rise to a height of about eighteen feet above the granolithic walk. The promenade will be about 240 feet long and will extend from the present line of the water house to the granolithic walk. Originally it had been intended to provide a railing along the top but Commissioner Bowman has decided that this will offer an element of danger to youngsters. Accordingly he has revised the plan to substitute a concrete coping, three and a half feet high.
