HOW TO GET READY FOR THIS SUMMER'S FLIES

In the Better Babies department of the May Woman's Home Companion appears some practical advice to mothers on various housecleaning matters. On the subject of fighting flies successfully appears the following: 'Flies breed and thrive in filth and carry it into your home. Be ready for them with screens and swatters. Repair broken screens. A hole in the screen may eventually mean a hole in your family circle. Flies multiply in garbage. Have your garbage can emptied regularly and keep it covered. After emptying the tin, flush it with carbolic acid solution, three tablespoonfuls of 35 per cent. carbolic acid to each quart of hot water. This solution destroys fly life in egg or maggot form.'
