

DR. DIXON CLOSING DECADE'S SERVICE

Notable Record of the Pennsylvania Commissioner of Health, Who Is Reappointed

Dr. Samuel G. Dixon, whose nomination as commissioner of health, was sent to the Senate last night by Governor Brumbaugh, was to-day confirmed by that body. This is Dr. Dixon's fourth appointment to this responsible position and within a few days he will have completed ten years of service in this office which is of such vital importance to the welfare of the people of the Commonwealth.

Dr. Dixon was appointed by Governor Pennypacker on June 6, 1905, shortly after the passage of the act of assembly creating the State Department of Health. He was reappointed March 1, 1907, by Governor Edwin S. Stuart and on March 1, 1911, by Governor John K. Tener. Under his able direction the Pennsylvania Department of Health has achieved first place among the public health organizations in this country and its work which has been accomplished has attracted attention at home and abroad. At the present time the department has between three and four thousand employees and its activities reach to every section of the State. In the campaign against tuberculosis, which ten years ago was the chief cause of death in Pennsylvania, one hundred and fifteen tuberculosis dispensaries have been established and three great State sanatoria at Mont Alto, Cresson and Hamburg have been constructed under the supervision of Dr. Dixon. In ten years tuberculosis has fallen from first to second place as a cause of death in this State and the rate is steadily declining year by year.

Four thousand deaths and forty thousand illnesses from typhoid fever was the annual toll exacted from Pennsylvania's citizens ten years ago. To-day this has been decreased more than 75 per cent, and although in the meantime the population of the State has increased more than a million, the number of deaths from this cause is only one-fourth the former figure.

During the past year the death rate of 13.9 per thousand inhabitants was the lowest in the history of the State. More than seventy-eight thousand people are alive in Pennsylvania to-day, who would have died had the death rate of 1906 continued. Of these 78,916 lives, 40,528 have been saved by the reduction of four principal diseases as follows: Typhoid fever, 18,867; tuberculosis, 11,924; diphtheria, 4,848; whooping cough, 4,092. During these years 1,747,000 babies have been born in Pennsylvania whose births have been recorded with all the facts concerning them, in the Bureau of Vital Statistics of the Department of Health.

Since its establishment the Pennsylvania Department has served as a model for numerous other States that have desired to profit by the methods which have been here inaugurated.

For Sallow, Wrinkled, Freckled, Pimpled Skin

If you have any cutaneous blemish, do not use paint, powder or anything else to cover it. Too often this only emphasizes the defect. Besides, it's much easier to remove the disfigurement with ordinary medical wax. Applied nightly, the wax will gradually remove freckles, pimples, blackheads, moth-patches, sallowness, red or yellow blotches, or any surface eruptions. The affected cuticle is absorbed, a little each day, until the clear, soft, youthful and beautiful skin beneath is brought wholly to view. Ask the druggist for an ounce of mercurized wax and use this like you use cold cream. Remove in the morning with soap and water. Many who have tried this simple and harmless treatment report astonishing results. If bothered with wrinkles or crow's feet, a wash lotion made by dissolving an ounce of powdered salixite in a half pint witch hazel will prove remarkably effective.

Hairs Will Vanish After This Treatment

(Toilet Helps) You can keep your skin free from hair or fuzz by the occasional use of plain salixite and in using it you need have no fear of marring or injuring the skin. A thick paste is made by mixing some of the powdered salixite with water. Then spread on the hair and after 2 or 3 minutes rub off, wash the skin and all traces of hair have vanished. Be careful, however, to get real Delatone.—Advertisement.

HOW TO REDUCE YOUR WEIGHT

A SIMPLE, SAFE AND RELIABLE WAY People who are over-burdened with superfluous fat, know only too well the discomfort and ridicule that over-stout people have to bear. If you are carrying around five or ten pounds of unhealthy fat you are unnecessarily weakening your vital organs and are carrying a burden which destroys the beauty of your figure. There is no need of anyone suffering from superfluous fat. If you want to reduce your weight in a simple, safe and reliable way, without starvation diet or tiresome exercise, spend as much time as you can in the open air, breathe deeply and get from any good druggist a box of oil of korelin capsules; take one after each meal and one before retiring at night. Weigh yourself once a week so as to know just how fast you are losing weight and don't leave off the treatment or even skip a single dose until you are down to normal. Oil of korelin is absolutely harmless, is pleasant to take, helps digestion and is designed to consume the excessive fatty tissue by increasing the oxygen-carrying power of the blood. Even a few days' treatment should show a noticeable reduction in weight, footsteps become lighter, your work seem easier and a lighter and more buoyant feeling take possession of your whole being. Every person who suffers from superfluous fat should give this treatment a trial. There is nothing better.—Adv.

HOUSE CLEARS OFF ALL ITS OWN BILLS

Works Until an Early Hour This Morning to Advance Legislation to the Senate

Members of the House of Representatives worked until almost 2 o'clock this morning to clear the calendar of House bills so that they could reach the Senate and stand a chance of passing this session. In the number passed was the bill to erect a monument to Molly Pitcher, the heroine of Monmouth, at Carlisle. Other bills passed finally were: Empowering boroughs of the State to form an association, and to authorize erection of garages on highways ten feet or more in width. Enabling second class townships to tax occupations. Providing mileage and fees for witnesses attending coroner's inquests. Empowering boroughs to fix the salaries of burresses. Creating a bureau of optometrical education, examination and licensure. Regulating duties, powers and fees of coroners. Regulating soliciting of life insurance. Establishing duty of insurance commissioner in prosecutions for violation of insurance laws.

Among the Senate bills reported to the House were placing soft coal miners under workmen's compensation; regulating assessment for damages for private property taken for park or parkway purposes; establishing State employment agency supervision; re-enacting initiative and referendum in third class city law; placing inspectors of weight and measures under Bureau of Standards; punishing deceit in sale of fruits, vegetables, seeds, plants and trees; requiring information to be given to purchasers of poultry; the "pure lime" bill, and the geological survey appropriation. The House cleared a big second reading calendar, including the appropriations for Capitol Park Extension and establishing the State bureau of experiments in mines. The bill to provide for a commission on building and loan association laws was dropped from the calendar. The Philadelphia housing bill was amended to make it effective December 31, 1915.
