MOST OLD PEOPLE ARE CONSTIPATED

The wear of years impairs the action of the bowels. With advancing age people are disposed to restricted activity and exercise, which is responsible for the constipated condition of most old folks. The digestive organs are more sensitive to the demands made upon them and rebel more quickly.

A mild, effective remedy for constipation, and one that is especially suited to the needs of elderly people, women and children, is the combination of simple laxative herbs with pepsin that is sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin. A free trial bottle can be obtained by writing to Dr. W. B. Caldwell, 452 Washington St., Monticello, Ills.

ROTARY CLUB HEARS "SIX-SIX" PLAN

Prof. Koch Makes Recommendations He Believes Would Work Out Well Here

While carefully refraining from

While carefully refraining from criticism or recommendations that might embarrass officials of the Harrisburg school district, Professor Charles E, Koch, State inspector of the pholic school searly intimated in an address before the Harrisburg Rotary Club, following a dinner at the Harrisburg club last night, that the so-called "six-six" school plan could be worked out here to the advantage of the public school system and the material benefit of the public school system and the material benefit of the public school system and the material benefit of the public school system and the material benefit of the public school system and the material benefit of the public school system and the material benefit of the public schools—three in a junior high school and three in a high school proper.

Professor Koch originated this plan in the Phillipsburg high school in 1903 and it has been widely adopted.

Professor Koch saddress was delivation at the invitation of the education when the six-year high school system for this city and authorized Dr. S. Z. Shope, chairman, to have a report made by an experienced educator. When Professor Koch was asked what steps would be necessary to introduce the plan in Harrisburg herefore the questioner to a local school authority and D. D. Hammelbaugh, secretary of the School Board, a member of the Rotary Club, replied that there was little prospect of such a change so long as the people of the city displayed their present unwillingness to spend money for high school purposes. He said the introduction of the system would probably not relieve the present necessity of two daily sessions in the Central high school, because only about 250 pupils would be taken from the four-year school and placed in the junior schools, which would still leave too large a number to be handled in ordina were cut up into recitation.

Professor Koch said under the six-six system Harrisburg would have approximately \$40 pupils in the three-year high school and about 1,550 in the junior schols, which, he thought, w
