### Give the Children Crisco Foods

CRISCO

Crisco foods taste as good as they look and what is most important, they are digestible.

Crisco cookies, doughnuts, gingerbread, etc., are good for children, because Crisco is a pure and absolutely all vegetable cooking fat. It is the cream of food oils, made possible by the discovery of the scientific "Crisco Process."

## CRISCO

For Frying - For Shortening For Cake Making

makes fried foods more delicious and wholesome. It makes digestible pie crust. Crisco cake is as rich as the most expensive butter cake.

Try Crisco in your favorite recipe. For shortening, use a little less than you would of butter or lard and in cake making, cream it thoroughly. Use plenty for deep frying, for the same Crisco can be used over and over.

### Additional Crisco Facts

Crisco takes proper frying temperature without smoking up the kitchen. You can fry fish, then onions, then potatoes in the same Crisco, merely by straining out the food particles after each frying.

Crisco in place of butter in cookies, cakes, scalloped dishes, etc., gives proper richness at much less expense. Salt should be added when used in place of butter.
