tilating system placed in the house when it was built, is in excelent working condition. It changes the air in the theater every two minutes, assuring patrons of good air to breathe and a temperature much cooler than the average theater at this time of year.—Advertisement.

EDMUND BREESE IN "THE WALLS OF JERICHO," THIS EVENING AT THE REGENT

Barney Williams' "Summer Girls," vho have been at the Colonial Theater for the past two days, will end their tays to-night and their tays to-night as proved one of the colonial summer season. It is a miniature musical corredy well suited to the likes of audiences that patronize the Colonial Founce gives a very entertaining piano accordeon act. The Colonial is proving ts worth those days as a good theater for warm weather. The excellent ventors were more than the colonial to OF JERICHO," THIS EVENING AT THE REGENT

"The Walls of Jericho," with Edmund Breese, will be shown this evening at the Regent. This virile story of English social life is a message—a warning to modern civilization against the decadence of its very foundations. It is a clarion blast against gambling, dissipation and tendencies just as injurious to our social being. The story revolves about a self-made millionaire who marries a lady of royal birth, whose associates in the smart set almost lead her to destruction.—"David Monday and Thesday — "David Monday — "Davi

time of the year, but it requires more care and system than just to allow the hens to attend to it themselves.
They cannot be permitted to lay anywhere they please, nor can the poultry raiser gather eggs irregularly or occasionally and then market them at the week-end, dirty, stale and possibly spoiling because of being held too long in warm weather.

Summer If

approaches, some special care must be given the laying hens if the maximum egg yield is to be expected during the lexitomely hot weather.

Kinds of Feed Important
The feed should be gradually changed so as to have less fattening reporteries, because the hen does not need the fatty material to keep up her bodily heat when she is not resisting cold. This means feeding less corn and cornmeal in the summer than in the winter and Spring. Vegetables and green feed should be increased, as these tend to cool off the blood and increase the amount of water in the system of the hens. Since vegetables such as beets, cabbage, etc. abound in the summer, they should be feel liberally. Grasses, such as clover, alfalfa, and even blue grass lawn elippings, are a good green feed for hens, especially in the days in summer. Green feed is the cheapest feed the poultry raiser can use, and should be freely used at this important time of the year. If the propervariety is given, and if it is properly prepared, a laying hen will eat from twenty to thirty per cent. of her rations of succulent green feed.

Again, the methods of feeding should be different in the summer, they should be freely used at this important time of the year. If the propervariety is given, and if it is properly prepared, a laying hen will eat from twenty to thirty per cent. of her rations of succulent green feed.

Again, the methods of feeding should be different in the summer from those practiced in the winter. An abundance of exercise is necessary in the winter, but it is not so important in the summer. There should be enough to keep the hens from becoming over-fat, but usually with range and open weather of summer, there is not much danger of over-fat, especially if the corn, cornmeal, and similar foods are held down to not over one-third of the entire summer feed in deep litter to make the hens dig, unless the yards are very small.

Shade Should Be Ample
If possible, hens should have more range in summer and have pienty of shade. The shade should not be over more

hens dig, unless the yards are very small.

If possible, hens should have more range in summer and have plenty of shade. The shade should not be over more than one-third of their runs, or there will be trouble in a damp, rainy season. There is such a thing as too much shade even in the summer time but the fault is more often the other way. Where no natural shade can be had such as a grove or orchard, sun shades must be made by stretching cloth about four feet off the ground or else by building low frame sheds with all four sides open for the air to pass through, thus enabling hens to protect themselves and at the same time have the advantage of any passing breeze. It is impossible to get a good yield of summer eggs if the hens must stay in the coops during the heat of the day to protect themselves from

Look After Your Flock

You can't give your little flock too much attention at this season of the year. If you are to develop young chicks into profitable layers this Fall and next Spring, you must know what to do to get the results.

Next Saturday, Dr. Thomas J. Clemens, practical poultryman, will tell our readers how to insure future productiveness, how to identify different ailments, and how to apply home remedies that will be effective and economical.

Whether you spend the summer months in the city, or country, at the lake, mountain or seashore, the season brings added responsibility in the extra care to be devoted The hair in particular needs more attention than at any other time. The perspiration that exudes in increased quantities carries with it waste and poisonous matter, which unless removed promptly, clogs the pores and irritates the scalp. This makes it doubly difficult to keep the hair and scalp sweet and clean, and renders the frequent and intelligent use of Newbro's Herpicide ADDS TO YOUR COMFORT It is refreshing. Regular applications give a sense of coolness and cleanliness besides keeping the hair and scalp healthy. Herpicide adds gloss and beauty to the hair and thus increases one's personal charm and If the hair be wet from bathing, whether in fresh or salt water, Herpicide quickly restores the natural fluffiness and softness. It stops itching of the scalp, due to dandruff Possessing a dainty, exquisite odor, Newbro's Herpicide is an ideal hot weather hair dressing. When you start away on your summer outing have a bottle in your grip. Send 10 cents for sample bottle to the HERPI-CIDE CO., Dept. 126-B, DETROIT, MICH. Applications at the better barber shops.
