

Submarine Photograph May Help Recover Sunken Gems

Pictures to Be Shown at Colonial Will Illustrate the Possibilities

A DIVER EXAMINING THE HULK OF A WRECKED VESSEL.

It may soon become possible to locate, and then recover, much of the treasure lost in the sea by means of the Williamson submarine tube. Just how this may be done is illustrated in these "movies" which the Universal Film Company will present at the Colonial Theater, Monday, Tuesday and Wednesday. While taking their pictures in the crystal waters of the Bahama Islands, there was discovered on the bottom of the sea, the wreck of an old ship.

163 CENTRAL SENIORS RECEIVE DIPLOMAS

[Continued from First Page.]

Board, presented the alumni prize. Mr. Boyer gave the students their diplomas. Benediction was said by the Rev. Dr. Mudge, the exercises closing with a march by the orchestra. Mr. and Mrs. William J. Cozzoli, of Market street, are occupying their bungalow at Paxtonia for the summer. The Misses Josephine and Margaretta Wohlfarth are guests of Mrs. Cozzoli this week.

ONE OF FERNCLIFFE BLACKSNAKES PLAYING WITH "JIM" THOMPSON

They're So Tame Down That Way That Any Person Who Likes 'em Can Pick the Reptiles Up and Use 'em For a Whip

JIM THOMPSON.

If you've a preference for snakes that are sweet tempered and blessed with a sense of humor rather than the kind that wear a continuous frown and can't appreciate a little joke, you've a chance to make their acquaintance if you are ever lucky enough to visit Ferncliffe.

city officials and their families frequently visit. James C. Thompson, chief clerk to the city bureau of highways was a recent visitor there. The first time you visit Ferncliffe the old-time guest will probably ask if you care for snakes. When you ask for details as to kind, character, etc., he'll casually suggest that you accompany him to the snake house. En route he'll inquire if you are afraid of 'em, whereupon you will declare your neutrality with an answering "Why?" This program never varies. In course of time you will be bound to be startled to the point of expressive yelling by the appearance of a big black snake sliding through the grass; probably you'll meet two or three others before you get to the snake house. And your guide, with ill-concealed joy, will carefully pick up the snake, twist it around and around to show his indifference to attack and otherwise boost himself in your estimation as a courageous soul. Before the lemonade is passed round that evening prior to retirement, someone will tell the story of the black snakes of Ferncliffe. There are four of them; the baby is four feet long, the eldest is nearly seven feet. Years ago they came to Ferncliffe and a home in a box was provided for them. Since then they've become so tame that they can be taken out of their nest before the approach of new visitors left to meander round in such places as will startle the new guests; and they are so gentle, and then when they've helped to anyone pick 'em up, bathe 'em, pat 'em on the head, hold 'em up by the tail, and then when they've helped to play their like joke they will docilely slide home and let themselves be put back in their box. And here is a picture of Mr. Thompson and one of the snakes playing the time-honored joke of Ferncliffe on a new guest.

You Pay Less For Better Quality at Miller and Kades
