CONDITION OF STATE TREASURY ALARMING

Continued from First Page. baugh to all department heads to contract none but absolutely necessary obligations.

Statement in Full

The statement, which is the first of its kind in many years, is in full as follows: "The failure of the Legislature to pass any laws for increasing the State's revenues, except the anthracite coal tonnage tax which is not at present available and unlikely to be for a long time to come, and the customary appropriation by the Legislature of sums in excess of probable revenues amounting to millions, has caused the condition of the Treasury to be alarming."

Withdrawal of Deposits

"Not only the General Fund, but the Sinking Fund is affected by recent legislation and a quite general withdrawal of deposits in inactive banks throughout the State will be necessary in connection with the creation of these various distinct funds. The revenues at this time of year are at the lowest ebb, while payments are very high. The activities of the great departments of the State government are naturally at a maximum at this season. For instance, the Highway Department is now requiring \$400,000 a month. During the last two days I have found it necessary to transfer from inactive active banks in order to meet current demands, \$865,000."

Notice to Bankers

"I am glad to have opportunity of making this statement not only for the information of the public generally but especially for the bankers throughout the State by way of explanation of the necessity for constantly closing accounts of inactive State depositors. The number of banks having deposits of State funds has diminished by more than 50 per cent. the last two years. Unless the coal tonnage tax should reach the \$100,000,000 mark, I see no prospect of any relief from the present pressure upon the Treasury."

Its symptoms are oversensitiveness, irritability, a disposition to worry over trifles, headache, possibly nausea.
