tention in the scientific world, has given out the straement that he has discovered the secret of the law of

gravitation.

"Gravitation," said Professor See,
"is an electrical phenomenon and does
not act instantly across space, but is
transmitted with the velocity of light,
thus coming from the sun to the earth
in eight minutes."

In his 600-page memoir, entitled
"Electro-dynamic Theory of Magnetism and of Universal Gravitation; Discovery of the Cause of Gravitation,
With Proof That This Fundamental
Force of Nature Is Propagated With
the Velocity of Light," Professor See
aims to show that gravitation is due to
elementary currents of electricity circulating around atoms of matter. The
celebrated French physicist Ampere
first showed in 1820 that two parallel
currents of electricity flowing in opposite directions repel. Professor
See's discovery seems to be an extension of the law discovered by Ampere.

Cornish. N. H., July 12.—President Wilson played golf near here this morning and sought relaxation from the press of official duties which have kept him busy for the past few days. On the way to the golf course he rode on the front seat of the automobile with the driver and appeared absorbed in deep thought but as soon as he reached the links he became interested in his game with Dr. Cary T.
