Operation Not Needed

Mrs. W. A. Barnes, who lives in Ballard, Calif., has sent to the Pinus Inboratories a very strong endorsement of Fruitola and Traxo. In her letter, Mrs. Barnes says:

"Doctors say gall-stones cannot be cured without an operation, costing much money as well as unnecessary suffering. I am cured, I know, and this is proof positive, and my friends know that such is the case."

Fruitola is a powerful lubricant for the intestinal organs, softening the hardened particles that cause so much suffering and expelling
the congested waste in an easy, natural sammer. A single dose is usually
sufficient to clearly indicate its efficacy. Traxo is a splendid tonic altersive that acts on the liver and kidneys, stimulates the flow of gastric
juices to aid digestion, and removes bile from the general circulation.
Traxo should be taken three or four times a day following a dose of
Fruitola to strengthen and restore the weakened, run-down system.

For the convenience of the public, arrangements have been made to supply Fruitola and Traxo through leading drug stores. In Harrisburg they can be obtained at Gorgas, the Druggist, 16 North Third street, P. R. Station.
