Building and Loan Increases Show Thrift of American Workingman

By Associated Press
San Francisco, July 27.—The building and loan association of the United States increased their assets a little more than \$100,000,000 in 1914, marking a growth of 8.72 per cent. over the previous year, according to the annual report of S. H. Cellarius, of Cincinnati, secretary of the United States League of Local Building and Loan Associations, made here to-day at the 23rd annual meeting.
"Considering the fact that this period included nearly six months of the great war in Europe, during which time there also existed in this country an industrial depression more or less severe, this showing speaks volumes for the thrift and saving habits of the wage earning classes of our citizens, who are the chief patrons of these institutions."
