MAY MAKE TRACTORS FOR U. S. GOVERNMENT. [Continued From First Page.] banks. They stood the tests well, according to S. F. Dunkle, an official of the company, and the army officers were said to have expressed satisfaction with the showing. Thirty Cars Ready for Russia. Stored at the lower end of the field where the tests were made are thirty cars recently assembled for the imperial Russian government, the first part of the 1,500 truck order secured from Russia and England to be made at the local plant. The Baldwin Locomotive Works, Philadelphia, to which a portion of the contract was sublet, have already shipped about 150 tractors. The first shipment from here will probably be made at the end of the week after Russian inspectors complete their work. An additional order for 400 tractors, it is expected, will be placed by two members of the Russian nobility and two prominent Englishmen who are on their way to this city from New York, where they were met by Robert L. Morton. Assemble Five Trucks a Day. The local plant is assembling an average of five trucks a day and with the assistance of Baldwin's expects that the large order will be turned out in the 90-day limit specified in the contract. Twelve hundred of the cars have been contracted for to date by the Russians and 300 will go to England. By the terms of the contract the responsibility of the Morton company ends when the cars are delivered at New York, Russia and England will have to arrange for transportation across the Atlantic. Democrats Must Find Way to Raise Revenue. Special to The Telegraph. Washington, D. C., July 28.—The next Congress, with less than a Democratic majority of thirty in the House, will have before it an important fiscal problem. This Congress, preceding a Presidential year, must confess that the Democratic policies, as complicated by the war, have failed to produce sufficient revenues. The state of the Treasury to-day indicates that the public purse will be about depleted by December, and a new method of raising revenue must be found by the majority party. One thing has been decided upon by the leaders. That is that no attempt must be made to revise the tariff in any way, as to do so would be an admission that the tariff has been a failure. There will be a fight from a portion of the South, however, for a revision of the tariff law with respect to the placing of sugar on the free list next May. By a combination with the Republicans of the West in the sugar-growing district, these Southern Democrats might force through a repealer in both houses. NEW RECORD IN STEEL EARNINGS. "Write an editorial," said the publisher of the Tibet Courier to his editorial writer, "about the disgrace of Prof. Scott Nearing's dismissal. Say that free utterance is necessary to growth and to independent thinking; that it is as necessary as a free press and ought to be as common." "But," said the editorial writer of the Tibet Courier, "I think a certain amount of dogma is necessary. Besides, we haven't a free press in Tibet, and you know it." "We have," yelled the publisher. "Go ahead and write what I tell you. Who owns this paper—or you?"—New York Tribune.
