Keep Cool! Eat lightly of meat, eggs and other "high-proteid foods". Eat lightly of starchy foods, such as potatoes, carrots, turnips and beets. These are the heat-makers and fat-makers—you don't need them in summer. Eat SHREDDED WHEAT with fresh fruits and green vegetables—the kind that grow above ground. All the muscle-making, brain-building material in the whole wheat grain prepared in a digestible form. Such a diet means clear brain and strong muscle for the day's work. Serve it for breakfast with milk or cream. Serve it for lunch with sliced bananas. Serve it as dessert for supper with sliced peaches or other fresh fruits. Ready-Cooked — Ready-to-Serve
