Hotel men from all over the State attended the hearing. Some of them expressed the opinion that female employes would favor the half-day holl-day two times a week, while others thought that the plan would not meet with approval in large city apartment hotels. James Price, president of the Taylor Hospital, of Scranton, declared that it would be wise to give employes the option of taking two half-holidays a week. This proposition seemed to meet with more favor than any suggested. Mr. Price pointed out that employes and superintendents could get together and draw up a schedule that would give everybody the full amount of holiday required and also make no one work more than fifty four hours a week, as is required by law. "If the employes are satisfied," said Mr. Price, "everybody else ought to be. People have ideas of their own as to holidays. They don't want a holiday thrust upon them, and in many cases they don't want to take a whole day, but would rather have two faremoons and evenings off a week rather than one full day would be better for the health of the women. J. Mr. Frazier, of the Bellevue-Stratford, and M. M. Harding, of the L'Alglon, Philadelphia, asked for a ruling as to whether they could work their employes overtime on certain occasions they even to they even do not same week. By Associated Press
London, Aug. 19.—Belief that a successful adjustment of the exchange rate problem now is assured is expressed by the morning papers although it is stated the government has not yet committed itself definitely to any particular plan.

Several conferences were held yesterday but there were no formal neetings. Presumably some delay will be necessary because of the decision to make whatever is done the joint action of the allies rather than of Great Mritain alone.

It is agreed that any adjustment scheme will provide, first of all, for a shipment of gold in an amount which possibly will surprise both the American and British publics, the idea being to effect such a complete restoration of confidence as to make easy the flootation of a good sized British credit in New York on favorable terms.
