Why Ice Melts Too Fast

Sometimes a customer will complain that the ice melts too rapidly.

When our DIS-TILLED WATER ICE melts too fast it is usually because of the way it is taken care of.

If the refrigerator has a separate compartment for the ice, the door should be kept closed except when ice is put in.

Many housewives place food directly on the ice and the door is constantly being opened. Sometimes the door is left open or is not closed tightly.

If you will be careful with the ice you will be surprised to see how slowly our DISTILLED WATER ICE melts.
