SEPTEMBER 13, 1915

Whether the enterprising citizens who are sitting up at hight working or the details for the municipal cele-tration next week know it or not, there will be considerable of the Old Home Week of just a decade ago about the festival. That occasion served to bring back to the city many people who had been active in the life of years before and the new cele-tran-to-the-old-town affair, will never-theless be the cause of quite a few wooming back to see how Harrisburg has progressed. Several of the hotels by visitors who will come to stay the ively days and there will be many yout the festival. The Old Home Week dea became national in its scope, and, while the official occasion may not have that in mind, it has a drawing power. The celebration in 1905 at-tracted attention of many to the strides made by the city as a result of the first improvement loan, but what was noted at that time will not be as attiking as what has been accom-plished since. To begin with, there and it has been of a character to be progress in municipal advancement in the sourt of a few this city has been pursuing a pretty well defined progress and has more to show than any city of its size even if it does not have the big new hotel or the city hall, is business has expanded and it has more diversified industry as well as a realization of the best way to build houses in its outlying districts. In sourcity is proven and which gets a municipality that is not afraid to a municipality that is not afraids to any thy big percentage in return.

One of the odd sights of the big storm that swept over the city on Sat-urday night was the parade of auto-mobiles into Harrisburg from every main highway. The day was so warm and so promising about noon that everyone who could seemed to get out of town by automobile with the result that the storm caught them many miles from the city. They came creep-ing back between 6 and 8, many of them much mud spattered. Not a few parties told of spending half an hour under trees while the storm raged, the storm being declared one of the worst of the year.

"Will you tell me," asked a friend the other evening, "just why a flag appears to be the sign of the jitney? I have noticed that practically every jitney wears a flag of some kind. A few have signs that you can read a block away, but the great majority of the cars just have a flag sticking up or a pennant hitched on. I saw one giddy jitney the other day that had some paper mops, like the old-style fly shooers that we used to see in the country. But the flag appears to be the repular method."

Governor Bunbaugh and his party of Pennsylvanian who attended the Pennsylvania day exercises at San Francisco will start on their home-ward way to-day. They are coming out of the Yellowstone to-day and will leave in their special train for the long trip across country. The party will be here Thursday shortly before noon if the train is on time.

The weather prevailing in this second tion the last few weeks must be the same at the summer resorts if the conversations of people at the Post Office can be used as a guide. The other evening three or four men hap-pened to meet to get mail and three pulled out postcards from friends on yuacations informing them they had just missed the best weather, nothing like the cold, rainy weather that had marked August at seaside and on mountains.

DO YOU KNOW

That steel for cars for Russia is being rolled in Harrisburg mills?

RADIUM is the one important commodity in the world which has dropped in price since the war. It was listed in London last month at \$1,000 per gram less than last year the depreciation was not caused by any decrease in the demand for it to be any decrease in the demand for the termination of the two any excess in the supply. The reduced price was due to the fact that for vears is likely to greatly bought. An important demand is from the medit of the British armin supply for its hospitals to supplement bu uses to which it has already been treatly for scientific work.
 All of the radium produced by the fact that for scientific work in the trenches. The small supple day the Radium Institute of the set ownich it has already been treatly for its hospitals to supplement in the trenches. The small supple day the fact for this purpose.
 Production Increases

Important Use The most important use of radium yet developed is that of curing cancer. In the opinion of many experts, it is the only genuine cancer cure in exist-ence. At the meeting of the Amer-ican Medical Association heid last month, in San Francisco, considerable time was given to the therapeutic qualities of radium, which are as yet in the beginning of their develop-ment. Cancer is a disease of fright-ful malignance which has increased with such rapidity within the last ten years that physicians are searching desperately for some definite cure. While many failures have resulted from the use of radium it has effected some seemingly miraculous cures. Its value in treating cancer has be-come so well established that two years ago in Germany the Kaiser con-ceived the idea of driving all cancer out of that country by establishing radium treatments in all hospitals. He ordered different municipalities to ap-propriate sums varying from \$50,000 r it as is desired for this purpose.
Production Increases
The production of radium in the forder of many experts, it is the only genuine cancer cure in existThe production of radium in the forder of Mines. Those methods devised by the Bureau to of Mines. Those methods have made it possible to produce radium at a f much reduced expense. A full gram of high grade radium, in the form of bromide, was produced in this count of high grade radium, in the form of bromide, was produced in this count of the ore, the insurance, the allowance which has increased with such rapidity within the last ten beginning of their development. Cancer is a disease of frightful mailgnance which has increased with such rapidity within the last ten bromide, was produced in this count of the ore, the insurance, the allowance which are as selled for the completion of the plant and the of the ore axpense. The lowest selling price for radium for several years pain for the idea of driving all cancer has been sli20,000 per gram. Only about thirty grams are in existences in a has had less than her share becaus of the idea of driving all cancer for the advantage gained by the readium treatments in all hospitals. He ordered different municipalities to appropriate sums varying from \$50,000 to \$500,000 for the purchaes of radium for hospital use.
That is fixed by the demand which is constantly increasing. The radium in tor hospital which own small quantities of radium and the numbre of cases treated with it even in small hospitals. The best results published have been those of the Samarian Hospital of Heidelburg where 50 is making a valiant attempt to corner every stray atom of radium, while Russia, France and England are equality anxious to acquire it.

Heard melodies are sweet, but those inheard are sweeter .- Keats.

BACKYARD GARDENS

THE Telegraph for years has urged the planting of backyards to ground that the family garden adds to the pleasure of life in or out of the city and materially reduces the cost of living. As an instance of what can be done in just a common back-yard, the case of a foundry foreman, one James Young, of an Ohio city, may be cited. Tomatoes were his chief item. He used hot beds and common sense. He raised besides, sweet peas, grapes, beans and other vegetables. He also raised puppiès and chickens. He made over \$300 out of his venture

of it all.

that the hour each morning spent in of an enforced shutdown. the garden, or in the evening in learning the rudiments of thrift, adds a sense of scrutiny that sustains them through the laborious working hours. Thomas A. Edison in discussing "Failures" said: "Failure is a matter of self-conceit. Men don't work hard because, in their self-conceit, they think they are so clever that they'll

HARRISBURG

March 4, 1917. EDITORIAL COMMENT

What the people of Galveston can't nderstand is why those Italian peas-nts persist in living on the slopes of 'esuvius.-Boston Transcript.

In Alabama they lynched three negroes accused of polsoning mules. The honor of mules must be protected, as they'd say in Georgia.—Philadelphia North American.

acquired to be used toward their fu- must forestry - or whatever appeals them. You, your children, your neighbors and Harrisburg as a whole will be the better for a host of backyard gardens next summer. Soon the Civic Club will make its final inspections of the gardens planted this summer and the club and the Telegraph prizes will be awarded. Are you going to be on the list or will you be among those who let their surely they are getting around to the backyards grow to weeds?

THE ILL-NOURISHED PUPIL

POVERTY of parents of school children is the subject of a bulletin just issued by the health authorities of Philadelphia. The bulletin says there are thousands of children in that city suffering from lack of food and that about three per cent. of the school population goes to school

without breakfast.

Only fifty or sixty per cent, have an inadequate morning meal, and ten per cent. eat a scanty breakfast before six o'clock

Coupled with bad housing conditions among the poor and the indiffer-ence of the parents, the child cannot be physically normal under such con ditions. The poorly-nourished child cannot compete with his well - fed

activities or tasks assigned hill. He might bear absolutely no relation to is easily the subject of diease and he the "predominating thought of Con-is the spreader of germs that sweep gress." But even though it should in epidemic form through the ranks happen that the two coincide, wouldn't of all classes of pupils.

t all classes of pupils. The condition in Philadelphia is nating thought of Congress" written serious. If by law children are forced to attend school, then the law ought to be responsible for their well-being. House? Democratic newspapers have They must be fitted for study and safe- become so accustomed to being bossed guarded against disease. An educa-tion is of small value if its possessor all interest in the rule of the majority. tion is of small value if its possessor all interest in the rule of the majority. has not the physical stamina to put it to use. We must get over the notion that the school is for mental training blunders,

Our progressive contemporary, the Allentown Chronicle and News, tells the story of how a flying ball gathered up with it half a dozen hawsuits and cost the county several hundred dol-lars. It was only a 10-cent ball, too, but it was knocked into Jacob Beck's yard and Jacob was accused of steal-ing it, after which other people be-came involved. ture education-a course in music, save us from brigands abroad who engineering, medicine, law, farming, regard their international treaties as to mere "scraps of paper."

BECOMING UNEASY HAT the tariff is going to be the

great issue before the voters of the United States next year is becoming more and more apparent. Even Democratic newspapers ad

mit that the Underwood law, so far from solving the tariff problem, has merely aggravated it. Slowly but view that a permanent tariff com-

nission, like that appointed by President Taft and discredited and thrown out of office by Democrats, is the only means of taking the tariff out of

The first step toward a perma-nent tariff commission is a constitu-tional step. Until that is done, whatever tariff commission there is will merely represent the predomi-nating thought of the congress upon whom the constitution im-poses the duty of regulating cus-toms.

This is nonsensical. The opinion of

school companion in any of the an independent tariff commission activities or tasks assigned him. He might bear absolutely no relation to

were not for the candidates. The courageous heroism and head-work of the police force of Washing-ton, Pa., was expressively lauded by the Daily News of that place. Robbers made way with property in the street car station and were pursued by the local force, who gave them plenty of chance to get a good lead, a la movies, and never came any nearer to them. One officer gave up the chase after running a few steps and the others soon dropped out and returned for reinforcements. Needless to say, the thieves made a good get-away. A secuel to the above account reads

SCHOOL FOR DISCONTENTS

"School for Discontents" has late-been opened in Kansas City, Mo., is receiving the approval of the

ly been opened in Kansas City Mo, and is receiving the approval of the been noticing its work. It is based upon the principle that children are likely to be contented in school if they are given work that interest them. The ordinary course of study sometimes fails to do this. Any child in Kansas City Who has passed the fifth grade in the regula school and is discontented can bo transferred to the Lathrop School, where he will have his energies en-gaged in some practical manner by pre-vocational work of the kind while he himself prefers. Boys are taught shop work, pat-tern making and carpentry. Girls are taught cooking, sewing, millinery and embroidery, with special provi-sions to meet individual need and de-sires. The boys receive instruction in mathematics as "shop arithmetic." They learn correct English as "com-mercial expression" and geography by the evident need in their work of se source of the supply for their different mate-rials. An Indiana woman has just died, at the age of \$9, after a controversy and loss of funds arising over her thir-teenth husband. The Williamsport Sun remarks in an editorial way that "this well-endowed woman retained her belief in men to the very end, and had accumulated considerable prop-erty as the result of her numerous widowhoods, both grass and by the funeral route." The thirteenth hus-band always has proven to be unlucky.

means of taking the tariff out of politics. This right-about-face is the first open admission of Democratic newspapers that the Underwood tariff law is the rank failure the general public knows it is. After going at some length into the merits of such a commission, one of the Wilson publicity organs has this to say: The first step toward a perma-nent tariff commission is a constitu-

Three big iron boxes, six feet long, two feet wide and two feet deep, which are the solid iron frames for entrances to the new vaults in the Reading City Hall, were mistaken for coffins by the councilmen of that city, who desired to know whether they were not for the candidates.

What Cancer Will Do

A resume of the cures effected in different European countries establish-es the belief that radium will abso-lutely heal all skin cancers and may frequently be used successfully upon certain forms of interior growths, though few go so far as to insist upon
