Finest Queen olives, full quart, Mason jars 25c. 'Hofer' sardines; toasted in tomato sauce; large cans 19c. Dives, Pomeroy & Stewart—Basement.

DEMOCRATS TRY TO CONCEAL PLIGHT

[Continued From First Page.]

alike for their failure to encourage more representative men to enter the lists for the chief place in the city government. However, the real truth of the situation is that the Clark act has so denuded the office of Mayor of real importance that that class of citizens who would serve their community for the sake of service are not willing to become the targets of abuse and vilification in a contest with individuals who seem to regard the office as a mere political job.

Reports throughout the city seem to indicate that there is a rising tide of resentment against the unfair tactics being employed by individuals against City Commissioners Bowman, Lynch and Taylor, who represent the majority of the present Council. One prominent businessman said to-day: 'It is absurd to expect these officials to give better service at the outset of a new plan of municipal government. They were compelled to waste months of the first year of their term of two years in getting a fair knowledge of their duties under the changed conditions. But I doubt whether any city officials or set of officials in many years can present a better record of substantial accomplishment. Anyhow, what would be gained by dismissing these Republicans and getting in their places three other Republicans or three Democrats who have had no experience in the work of these important departments. Unless the taxpayers who are not content above political advantage get awake to the fact they will find that they have lost sight of their own best interests.'

It is apparent in a large number of intelligent citizens who do not say much and who are not active in a political way that the noisemaking of the Democratic machine is a demonstration to divert attention from the efforts of the machine to land its own combination. While talking about the alleged political activities of the three Republican members the Democratic machine boldly avoiding any reference to the very active political performances of the Messrs. Royal and Gorgas during the last two years of the city government, especially to criticize his Republican colleagues inasmuch as he has been more ornamental than useful throughout the entire period. His frequent play to the galleries at the session of the City Council has been understood by those familiar with municipal affairs and his Democratic associates are disgusted with the political flim-flamming. Republicans generally are coming to the conclusion that the best answer to the Democratic machine will be the re-election of Bowman, Taylor and Lynch with a fourth Republican member as an emphasis upon their attitude toward political fakery. With respect to the long list of candidates for the other offices to be filled there is of course the usual backing and filling, but leaders of the Republican organization in the city and county express the opinion that the public sentiment generally favors party harmony and a strong front after the Hickets shall have been placed in the field.

Turks Destroying Coast Towns in Anticipation of Dardanelles' Fall

London, Sept. 14.—The town of Phocaea, Asia Minor, twenty-five miles northwest of Smyrna, is reported to be in flames, according to a Reuter dispatch from Athens, which says it is inferred that the Turks are destroying coast towns and retiring into the interior in expectation of the fall of the Dardanelles.

ANARCHY IN PERSIA

London, Sept. 14.—Anarchy prevails in Persia, according to the Reuter Telegram Company. The government military forces have been defeated in a series of engagements with tribesmen and a number of Swedish officers who were in the service have been killed. The British and Russian colonies at Ispahan with French and British women missionaries have been forced to leave for Teheran. Ispahan is said to be controlled by a mob.

EARTHQUAKE FORECASTS;

[Continued From Editorial Page.]

By Frederic J. Haskin

ogist, had forecasted the coming of the Guerrero earthquake in Mexico, and Omori, the Japanese geologist, rang the giving warning of the coming of the earthquake at San Francisco and that which a little later disturbed Valparaiso, Chile. It is the fact of its long immunity from shock that causes geologists to predict that the Panama Canal region is in great danger of a shaking up of any point on the continent. There are scores of faults on the isthmus at which these have been slips one way and another in the geological past. These have resulted in differing situations existing there. There have been times, for instance, when the two oceans met.

The government consulted with geologists before building the canal. It was told of the probability of a visitation but earthquake prognostication was not at that time sufficiently advanced to be taken very seriously. Even admitting it as a probability, a slip might not seriously injure the canal. It would break it in two and might raise or lower one end of it a few feet. But it would probably be possible to splice it together again and make the necessary adjustment. As the contraction of the earth presses the two sides of this break together with a terrific force there would be no such possibility as that of the earth opening up and swallowing Gatun Lake, and the incidental ships that might be thereabout.

Influence Still Working

The influences that make for possibility of an earthquake where Kentucky and Tennessee approach the Mississippi river are quite different. Whatsoever the internal influence that created the Appalachian mountains it is that work beyond the point where they end in the southwest. There is a pressure beneath a body of land in this region that has developed to a fault near the Mississippi; and occasionally there is a slip. Just a little over a hundred years ago there was such a slip and the trouble that it caused still is spoken of as the New Madrid earthquake. There are indications that these slips have occurred in the past at intervals of about a century and another is now regarded as being due. Yet even this does not develop the finer points of earthquake forecasting. Dr. Frank A. Perret figured many more elements than these when he warned the public to keep away from Sicily just before the Messina disaster.

POLITICAL ADVERTISING

For Recorder of Deeds and Clerk of the Orphans' Court FRANK J. ROTH

To the Republican Electors of Dauphin County: I am a candidate for nomination on the Republican ticket for the office of Recorder of Deeds and Clerk of the Orphans' Court of Dauphin County. For more than twenty years I have been the Official Stenographer of the Courts of Dauphin County, and for thirteen years an Attorney at the Bar. My long experience in and knowledge of court affairs, especially qualify me with a thorough understanding of the business of this very important office. I come before you as a candidate with the assurance of having the esteem and confidence of the general public; standing upon my record as a court official, as a citizen, and as a man. I beg you to believe that I shall highly appreciate your vote, and thank you for the honor you do me. If elected, my personal attention will be given to the office; and I shall earnestly strive to merit your approval by a courteous, conscientious and efficient administration—believing that course to be the right rule of conducting public as well as private affairs.

NOTE—I have never before been a candidate for public office, and am not connected with any factional fights.

Sincerely yours, FRANK J. ROTH.

He was assistant director of the Mount Vesuvius observatory and the great American authority on Mediterranean disturbances. He knew of the fault in southern Italy and that conditions were such as to put it under great strain.

Knowing such a condition to exist the scientist looks for the last straw that may cause the break. A very high tide on a beach may pile up a weight of water that will cause a slip at the fault. Heavy snows may have the same effect. High or low barometer may have a very great deal to do with the increasing or relaxing of the strain. Then there is the gravity pull of the planets when they are in certain positions.

It may be possible to foresee a time when there will be a heavy snow lying along a coast, when there is a high tide piled upon it, when there is a high barometric pressure, when the planets with a great gravity pull are on the other side of the world. This would be a remarkable combination in assistance of an area that is seeking to slip a little deeper down a jagged fault. If it is near the slipping it will reach it under these conditions. Mr. Perret foresaw such a conspiracy of circumstances at the time he issued his warning.

The tendency on the part of the earth being studied, may be to be pushed up instead of down. Then the most favorable conditions would be the reverse of the other case. The time of the break would be when the trees were lightest. It would be when the land is dry, when the tide is out, when the pressure is low, when the planets are on the same side of the world as is the region affected. Then the internal forces that are seeking to lift the region would have the lightest load and would be most likely to accomplish their end. The scientist says in general that an earthquake is likely to occur again in any region where one has been known in the past. Those living in such a region should, for instance, build houses that are earthquake proof. They should run into the open when they feel the first quake. Dogs whine in distress and cattle rush frightened from their beds before man appreciates the presence of anything unforeseen. They live nearer the earth than does man and have a stronger instinct of self-preservation. Man might be wise to follow their lead in danger zones.

For the Nomination — FOR — County Commissioner

On the Democratic and Washington Party Tickets. If nominated and elected, I pledge myself to vote for a reduction of the County Tax and devote my time to the office. Your Vote and Influence Will Be Appreciated. Primary Election, September 21, 1915.

POLITICAL ADVERTISING

For City Council E. Z. GROSS

I hereby announce myself as a candidate for City Council—assuring my friends that I am not, and will not be, controlled by any man or set of men and pledging myself to be in truth a nonpartisan councilman devoted to the best interests of the taxpayers and citizens of Harrisburg in general. My record as Mayor proves fitness and commands your confidence. Your vote, please.

STATE SESSION OF KNIGHTS

Grand Castle of Mystic Chain Opens at Hanover

Hanover, Pa., Sept. 14.—Fifteen hundred delegates are here for the forty-fifth annual convention of the Grand Castle of Pennsylvania, Knights of the Mystic Chain, which opened to-day. Three branches of the select body will also hold sessions here. They are the Grand Assembly, Degree of Naomi, a women's auxiliary; the Military Rank, and the Funeral Benefit Relief Fund. A score of castles and military companies from York, Lancaster and Dauphin counties, with bands, participated in a parade to-day. Burgess Henry M. Stokes made an address of welcome. Supreme Com-

mander Theodore Cook, of Philadelphia, and Supreme Secretary George Dovey, of Greencastle, Pa., were present.

ROMANIAN RELATIONS CRITICAL

London, Sept. 14.—A dispatch to the Times from Sofia says: 'The relations of Rumania with the central powers have reached a critical stage. The German government, in a recent note, demanded permission for the passage of Austro-German troops through Rumanian territory and the fulfillment by Rumania of an undertaking to supply benzine and other supplies to a value of \$40,000,000. Over 2,000 German wagons laden with war material are waiting on the Rumanian frontier.'

ADDITIONAL FORCES LAND ON PENINSULA

[Continued From First Page.]

driven off hostile warships and to have broken up infantry formation near Anafarta and Sedul-Bahar. Teutonic demands that supplies for the Turks be allowed to pass through Rumania and various moves made supposedly in connection with these demands attract attention to the Balkan situation. A partial mobilization of Rumanian troops has been ordered to meet the concentration of Austrian forces in Transylvania, according to reports from Athens. It is understood in Sofia that German has demanded permission for the passage of Austro-German troops through Rumanian territory

and the delivery by Rumania of various supplies engaged amounting to \$40,000,000. The tenseness of the Balkan situation is reported in Athens to be bringing Greece, Rumania and Serbia to consider joint action in case of an Austro-German attack on Rumania. Bulgaria is said not to be included in the negotiations in view of the Turco-Bulgarian agreement.

England Urged Not to Blame President For Stand on Peace

London, Sept. 14.—The Daily Sketch, a picture paper, with an enormous circulation under the caption 'Don't Blame the President,' prints an editorial protest against attacks upon the United States.

RIGA DEFENSES STRONG

London, Sept. 14.—After a three days' visit to Riga, the Times correspondent has reached the conclusion that the city is in an excellent position for defense. The works in its neighborhood are strong and well prepared to resist attack, while the river is broad and flooded by recent rains.

TO MEET IN PHILADELPHIA

The next convention of the Pennsylvania Woman Suffrage Association will be held on Tuesday, November 30, in Philadelphia.

PAUL A. KUNKEL Candidate For District Attorney In 1911, the Logical Candidate For District Attorney This Year, 1915 For Republican Nomination

Was he not counted out four years ago by failure to count double-crossed (and therefore emphatic) votes for himself? Did he not carry the People's contest into Court? What became of those ballots? As it was he lacked less than 70. Yes, he paid more than \$1200. Court costs in an effort to have every vote cast for him counted. He was determined that no voter's ballot should be ignored and thrown out; that no voter should be disfranchised. He succeeded in showing that more than 70 votes emphatically marked for him had not been counted, and notwithstanding but rather because of that success he was compelled to pay more than \$1200. Court costs (\$400 his own, voluntarily, and \$800 of M. E. Stroup's, when compelled, Dec. 1914, by order of Court only). He was deprived of the office because 65 more such votes were not found in the dilapidated and broken ballot boxes. He now carries this case to the People and asks for a verdict of the People in his favor. Vote for Paul A. Kunkel, your friend and advocate. Primary, Sept. 21, 1915.

He stands for Independence, an Honest Election, Courteous Treatment, a Common-sense Administration of Office, a Square Deal for Everybody.

He declares also for only one term. There are other Members of the Bar capable of filling the office. A monopoly would prevent.

FOR CITY CONTROLLER (Nonpartisan Office) DeWitt A. Fry I THANK YOU FOR YOUR VOTE AND INFLUENCE. Primary, September 21, 1915.
