The Lehigh Valley Transit Co. will run limited trains direct to the grounds from Sixty-ninth Street and Chestnut Hill, Philadelphia.

H. B. SCHALL, Secretary.

## Every Ton Sun-Glo Coal

is good dependable fuel.

SUN-GLO COAL will warm your house as you want it warmed.

SUN-GLO COAL will cook your meals to your wife's entire satisfaction.

SUN-GLO COAL gives the maximum amount of heat with the minimum amount of trouble.

SUN-GLO COAL is high in Carbon and low in Ash.

SUN-GLO COAL comes in all sizes and grades, Hard, Medium and Soft.

United Ice & Coal Co.  
Forster & Cowden  
Hummel & Mulberry  
Third & Broad  
15th & Chestnut  
Also Steelton, Pa.

## LANCASTER FAIR

September 28, 29, 30  
and October 1

Near Long Park

TWO MILES WEST OF LANCASTER

REDUCED FARE EXCURSION TICKETS  
will be sold September 28 to October 1, inclusive, good on date of issue only, from Harrisburg, Littlestown, New Freedom, Peach Bottom, Pauli, and all intermediate stations, except those from which the regular excursion fare is less than 50 cents.

SPECIAL TRAIN, Thursday, September 28  
will leave Lancaster 6:00 P. M. for East Downingtown and all stations on New Holland Branch.

Frequent Special Trains between Lancaster and Fair Grounds

PENNSYLVANIA RAILROAD

## ROTARY CLUB ADOPTS FINE NEW PLATFORM

### Joins With Others All Over World to Raise Standard of Its Service

The Rotary Club of Harrisburg has adopted the new Rotary platform of the International Rotary Clubs. It was read as follows for the first time at this week's meeting by President Arthur D. Bacon and is as follows:

"Recognizing the commercial basis of modern life as a necessary incident in human evolution, the Rotary Club is organized to express that proper relation between private interests and the fusion of private interests which constitutes society.

"To accomplish this purpose more effectively the principle of limited and representative membership has been adopted. The Rotary Club consisting of one representative from each distinct line of business or profession. Each member is benefited by contact with representative men engaged in different occupations and is enabled thereby to meet more intelligently the responsibilities of civic and business life.

"The basis of club membership insures the representation of all interests and the domination of none in the consideration of public questions relating to business. On account of its limited and representative membership the Rotary Club does not constitute itself the voice of the entire community on questions of general importance, but its action on such questions is of great influence in advancing the civic and business welfare of the community.

"The Rotary Club demands fair dealing, honest methods and high standards in business. No obligation, actual or implied, to influence business exists. The election to membership therein is an expression of confidence of the club in the member elected and of its good will toward him. As his business is an expression of himself, he is expected actively to represent it.

"Membership in the Rotary Club is a privilege and an opportunity and its responsibilities demands honest and efficient service and thoughtfulness for one's fellows.

"Service is the basis of all business.  
"He profits most who serves best."

## TRAVELETTE

By NIKSAH  
ST. MARY

St. Mary, Maryland, is the Plymouth Rock of the South. There came George Calvert and his two sons, Cecilius and Leonard, in 1632, and planted this, the first settlement in Maryland. For two centuries the community waxed rich and populous and then the ebb came.

St. Mary is the modern world. When George Calvert settled there it was in the very front door of America. One had but to sail in at the wide mouth of Chesapeake Bay and turn to the left up the first stream. This was the Patuxent River, the natural habitat of the best oysters in the world. Those were days when commerce went forward by water, and gentlefolk were satisfied to ride blooded horses life.

But with the growth of the railroad, water traffic died and horseback riding became confined to the outlands.

St. Mary has never heard the whistle of a train, is but occasionally the arrival of a steamer, steamboat comes up to its old harbor. The roads are not inviting to the automobile. This one time metropolis of the South, this busy mart of the pre-revolutionary times, has found itself in an eddy of the centuries and gone to sleep.

St. Mary, the town, and St. Mary, the county, are typical of old estate life still existing further down the Patuxent. It is known as Sotterley, and the house was built in these early, gala days of Maryland by an indentured man from a London prison who was an architectural genius. Here is to be found interior woodwork of mahogany and walnut, great easy seats, always the same, four feet, hand-crafted rooms of ballroom proportions, gable roofs, dormer windows. Deep-throated chimneys invite the back-log. The mass of ages has accumulated on the roofs. Only the glory of the past remains.

Yet here dwelt the early governors of Maryland. These people though Catholics invited the Puritans to come from New England into their land of plenty and share it. From this settlement went Father White to convert the Emperor of Piscataway, who was a mighty Indian chief living where the city of Washington now stands.

Old St. Mary fought for a century with Annapolis before yielding it the capital, and for a like period with Baltimore, before capturing this city the palm of being the metropolis.

Yet in the strange metamorphosis of time once proud St. Mary has found itself stranded beside a sluggish lagoon and forgotten, while infant Chicago and Pittsburgh are flaunting the world with their achievements.

### Bankruptcy Will End War, Ford's Prophecy

*Special to The Telegraph*

Detroit, Mich., Sept. 20.—If I were to live with the future generations of Europe I would urge the people to repudiate their debts and armament plans by their governments in this war. I believe it is the duty of the people to repudiate them. What right have the governments of Europe to impose on future generations the unbearable burden they are amassing through this war?"

Such and similar sentiments were expressed to-day by Henry Ford, the automobile manufacturer, in an interview regarding means for overcoming the forces of armament. Mr. Ford would welcome bankruptcy for the belligerent nations to put an end to the "whole miserable business" and prophesies the building of a new type of submarine which he terms a "fish boat" to sweep the navies of the world off the seas, making wars impossible in the future.

"The best thing that could happen would be for the nations of Europe to go bankrupt; then they would be compelled to stop fighting," said Mr. Ford.

### To Demonstrate Edison's New Submarine Batteries

The new battery developed by Thomas A. Edison for submarine use, deliveries of which are already being made to the United States Government will be shown to the public for the first time at the forthcoming Electrical Exposition, October 6. The army and navy departments of the United States Government will show the uses of electricity in modern warfare.

An accident in the radio research laboratories of John Hays Hammond, Jr., at Gloucester, Mass., has destroyed his selenium cells and therefore made impossible the first public exhibition of his wonderful invention, the wireless telephone. His invention, which promises to revolutionize modern warfare, depends for its operation on selenium cells. These cells come from Europe and it is quite improbable that any more can be obtained until after the war.

On this subject, the radio research laboratory of John Hays Hammond, Jr., at Gloucester, Mass., has destroyed his selenium cells and therefore made impossible the first public exhibition of his wonderful invention, the wireless telephone. These cells come from Europe and it is quite improbable that any more can be obtained until after the war.
