How to Keep Face Young and Attractive

The way to ward off old age is not to fear it, not to allow one's self to be oppressed by the dread of advancing years. Use only legitimate preventives and avoid trying experiments with preparations not indorsed by physicians. An entirely safe and very effective way to keep the complexion young-looking and beautiful is to apply ordinary mercolized wax at bedtime, using it like cold cream, washing it off in the morning. This gradually absorbs the withered, faded cuticle, which is replaced by the more youthful, pink-tinted underskin. One ounce of this wax, to be had at any drug store, is enough to completely rejuvenate a worn-out complexion. Crow's feet and other wrinkles, the first signs of advancing age, may be removed by a simple, harmless preparation made by dissolving an ounce of powdered saxolite in a half pint witch hazel. It is used as a face bath. —National Hygienic Review.—Advertisement

known throughout the country. The meeting will be open to both men and women. All are invited. The remaining sessions of the conference will be held in the First Baptist church, Second and Pine streets, Monday and Tuesday, September 27 and 28 at 3:30 and 7:45 o'clock.
