CUTTING OUT SHOCKS

By Frederic J. Haskin

[Continued From Editorial Page.]

teach how to avoid danger. The new National Safety Code is divided into four parts. The first governs the installation and maintenance of electrical supply stations and equipment. The second applies to overhead and underground electrical supply and signal lines; the third deals with electrical equipment in workshops, and the fourth contains safety rules for the operation of electrical equipment and lines.

Fatalities in Home

An increasingly large number of fatalities occur in the home, chiefly because many persons have the false impression that it requires high voltage to produce fatal results. Death comes frequently from contact with ordinary 110 or 220 circuits. When proper precautions have not been taken in the wiring of a house, a person may become a part of low voltage circuit by standing upon a concrete floor, or touching metal pipes in a bathroom, laundry or kitchen, while the hand is also in contact with electric fittings.

Men have been electrocuted in their own basements while going to replenish the furnace fire. If one stands upon a concrete floor as he reaches for the socket to turn on the electric light, he may touch the brass shell which has come in contact with the "live" parts within, and receive the fatal shock instantly. A switch connection at the top of the stairs overcomes such a risk.

A bank employee carried a lamp socket into a vault. The insulation of the socket was defective. The metal floor of the vault was a conducting agent for the current, which took his life. A young baker in Nebraska touched a live wire accidentally exposed while he was putting away some metal bake pans. He was killed instantly.

Never Touch Both

The danger from contact with a metal bath tub or gas range, both of which have connecting pipes running down into the ground where they possibly may come in contact with live wires, is avoided by never touching electric equipment, and either of these objects at the same time. The electric light in the kitchen should be so placed that a woman could not turn it on at the same time she is trying to light the gas range. Several fatalities have been reported from this cause.

A number of persons have been killed by attempting to use an electric vibrator in the bathtub. Dampness and water are excellent conductors for electric currents. And one using an electric iron in a damp-floored basement should be sure to stand upon a thick dry board.

Last Spring several Philadelphia Boy Scouts constituted themselves a self-appointed guard over a live wire until the authorities they had notified could reach it. For several hours they took turns in warning people and doubtless kept dozens of people from coming in contact with it. Finally a man came along who objected to being "bossed by kids." He gave the wire a violent kick. It flew in the air and came down on his face and hand, killing him instantly.

The ratification of the code of electrical safety rules by the conference next month is not to be regarded as final. The rules are to go on trial for a year to test their efficiency. Another conference will be held next year. It will include committees from every organization in any way affected by electrical hazards. It is expected that the reports of these committees will bring about still further revision of the rules which will be for their final object the elimination of accident from electrical causes.

HIGH PERCENTAGE OF PUPILS

Special to The Telegraph
Hummelstown, Pa., Sept. 28.—Hummelstown schools ended their first month on Friday last with a total enrollment of 463 pupils, of which 75 were high school students. The per cent. of attendance in the grades and high school was 97; that of the high school alone 97. The grammar schools girls' attendance was 100 per cent. In the high school 56 pupils had perfect attendance and 23 pupils in the grades attended every day. The borough teachers have organized a class for the study of the school problems and methods of instruction.

For Pile Sufferers

Sample Package of the Famous Pyramid Pile Treatment Now Offered Free to Prove What It Will Do for You.

Pyramid Pile Treatment gives quick relief, stops itching, bleeding, or protruding piles, hemorrhoids and all rectal troubles, in the privacy of your own home. The box at all drug stores. A single box often cures. Free sample for trial with booklet mailed free in plain wrapper, if you send us coupon below.

Special Excursion TO ZOOLOGICAL GARDEN

Girard Ave. (31st Street) Philadelphia, via Philadelphia & Reading Railway,
Saturday, Oct. 2
Round Trip Tickets, good only on trains noted below, will be sold at rates annexed.

SPECIAL TRAIN

From	Fare	Special
HARRISBURG \$2.00	L.V.A.M. 4.25
Hummelstown 1.75	6.25
Horseshoe 1.75	6.25
Swartout 1.75	6.25
Hershey 1.75	6.46
Palmyra 1.75	6.53
Anaheim 1.75	7.02
Girard Ave. (31st St.)	10.00

TICKETS DO NOT INCLUDE ADMISSION TO GARDEN
RETURNING—Special Train will leave Girard Ave. (31st St.) 5.50 p. m. for above stations.

Two Gold Medals—Highest Award at The Panama Exposition, 1915

Glenwood Coal Ranges, Gas Ranges, Furnaces and Heaters, awarded Two Gold Medals, at the Panama-Pacific International Exposition, San Francisco, Cal., 1915.

Glenwood Ranges are the product of New England's largest and best known foundry. They are designed by makers of life-long experience. They weigh more, are put together better and burn less fuel than most ranges. The castings are wonderfully smooth and easy to keep clean.

They are handsome, convenient and mechanically right—no modern feature lacking. Smooth cast, Colonial design, plain finish, compact structure, big roomy ovens, easy working grates and countless other features.

Owing to their sturdy construction and fine workmanship, they will stand hard usage, do better work and last much longer than the ordinary kind.

They certainly do "Make Cooking and Baking Easy".

Get one and make housekeeping drudgless.

Thin Folks Who Would Increase Weight

SIMPLE DIRECTIONS EASY TO FOLLOW

Thin men and women — that big, hearty, filling dinner you ate last night. What became of all the fat-producing nourishment it contained? You haven't gained in weight one ounce. That food passed from your body like unburned coal through an open grate. The material was there, but your food doesn't work and stick, and the plain truth is you hardly get enough nourishment from your meals to pay for the cost of cooking. This is true of thin folks the world over. Your nutritive organs, your functions of assimilation are sadly out of gear and need reconstruction.

If every way you've tried to put on weight has failed try these simple directions. Cut out everything but the meals you are eating now and eat with

An All Havana Smoke

If your preference is for an all Havana smoke you don't have to suffer from the effects of heavy tobacco—smoke

MOJA
10c CIGARS

They are made of all Havana, but of such a fragrant, full aroma quality that they will not hurt any smoker.

It's Getting Close to Coal Time

Do you realize that it will be but a short time before we run into that weather when a fire in the house will be necessary to health and comfort? Better be prepared. Look after your bins now, phone us your order, and we'll send you the kind of coal that gives out the greatest amount of heat units—the kind that goes farthest.

TRAVELETTE By NIKSAH DAMASCUS

Damascus, born of a stream that gushes from a mountain side and loses itself in the sand; Damascus, the oldest inhabited city in the world; Damascus, the pawn of nations since the dawn of the world, may find itself a new master at the close of the present war.

And, should Britain or Italy awake at the end of the war with this prize, it would be possessed of a wonder-city the equal of which there are few in the world. Damascus is in Syria at the eastern end of the Mediterranean. The occidentals have pushed a railroad across the sixty miles of desert that separate it from the sea and threaten to confine it to Mecca and haul by rail the thousands of Mohammedan Hajjs who congregate here each year for that pilgrimage.

The record of man tells not of the founding of Damascus. Yet it is known to have been born of water, for the river Barada gushes from Mount Anti-Lebanon, above it, flows for ten miles in a straight channel, then spreads out like a fan upon the high, desert plain.

This spreading out of its waters converts the desert into a garden of productivity such as is known only where irrigation is brought to alluvial plains. A hundred and fifty square miles of grove and garden here exist and have through the centuries flaunted to the world their fields of blood-red poppies, their scarlet pomegranates, their yellow apricots; have yielded their figs and walnuts and grain.

In the midst of this productiveness has grown a city of 200,000 souls, sufficient unto itself, yet the trading center of the sheiks of the deserts for hundreds of miles around. Plain and unattractive are the houses of Damascus viewed from the outside. But he who bends his back and enters the low door will be led into an enclosed garden of floral magnificence at the head of which is the throne-like seat of its master and off of which open the quarters of the women of his harem, and where this large family live in magnificent comfort.

Mrs. Harriman Loses Suit Involving \$60,000

Special to The Telegraph
Rochester, N. Y., Sept. 28.—A verdict of \$60,000 against Mrs. Mary W. Harriman and the estate of her husband, the late Edward H. Harriman, railroad magnate, was rendered by a sheriff's jury yesterday. Mrs. Anna N. Leaser, of Fenfield, brought the action to recover damages, alleging that false representations were made to her regarding a tract of land which she purchased from agents of Mr. Harriman in 1904.

No defense was entered by Mrs. Harriman.

B. S. CABLE KILLED
Special to The Telegraph
Byfield, Mass., Sept. 28.—Benjamin S. Cable, Assistant Secretary of Commerce and Labor under President Taft, was killed in an automobile collision here yesterday. Richard T. Crane, Jr., of Chicago, in whose machine Mr. Cable was riding, and Dr. and Mrs. David L. Edsall were injured. Mrs. Edsall's leg was broken.

Irving College Opens 60th Year With Social Reception

Special to The Telegraph
Mechanicsburg, Pa., Sept. 28.—Students at Irving College have commenced the new term with a delightful social time in addition to taking up regular study. On Saturday evening the Young Women's Christian Association gave an informal reception to the students and refreshments were

served to the guests. In the receiving line were Miss Abigail Hemminger, president of the association, of Greencastle; Miss Tirzah Grove, of Greencastle; Miss Vida Koser, of Arendtsville; Miss Naomi Wolf, of York; Miss Edith Zarger, of Greencastle; Miss Lana Grove, of Mercersburg; Miss Katharine Speights, of Westover, Md.; Miss Ruth Brandt, of Hagerstown, Md.; and Miss Madeline Fetter, of Telford.

On Friday evening a reception was

tended the new students and the faculty by the old students, when games and dancing were features of entertainment. Under the auspices of the St. Cecilia Music Club a victrola concert was given on Thursday evening of the opera "Il Trovatore," with a history of the same by Professor H. C. Harper.

This morning marked the formal opening of the sixtieth year of the college and the twenty-fifth year of the president, Dr. E. E. Campbell.

1915 Fall Models Now Being Shown

Rengo Belt
Reducing Corsets

Strictly specialty corsets made only for stout and medium women.

You will find that your weight and strength are matched in the strength of these corsets.

The principal reason for this great supporting strength is in the **Rengo Belt** tailored-in feature, now made famous by seven years of test and success. If this principle were not scientifically correct for stout and medium figures, **Rengo Belt** corsets would cease to exist, for it is the foundation of every garment of every model. Please note that the **Rengo Belt** adds no material weight or bulk, but multiplies the strength many times.

There are models with and without "Steelastic" webbing. When extra flexibility and added support is desired, our exclusive "Steelastic" will be found to possess superior strength and wearing quality.

Boned throughout with double watch spring steels—guaranteed not to rust.
