When you wash your hair, don't use soap. Most soaps and prepared shampoos contain too much alkall, which is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified cocoanut oil, for it is pure and entirely greaseless. It's very cheap, and beats soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.—Advertisement.
