The Knight Motor is acknowledged to be the most highly developed automobile motor on the market.

This motor differs from other motors in that where all others deteriorate with use, this improves; to all others carbon is harmful, here it is beneficial; size for size it has more power.

It has no noisy poppet valves; no noisy cams; no uncertain valve springs; no troublesome valves to grind; practically no wearing parts.

It is the ideal automobile motor.

The Willys-Knight has the same advantages and is just as efficient as those costly European Knight cars.

Yet it costs but \$1,095.

As we build more cars in a single week than most European manufacturers build in a whole year we are able to utilize every modern manufacturing economy.

That is why our price is so much less.

The Willys-Knight in our opinion has the least vibration, and is the smoothest, quietest and the most economical car made.
