

You want to hear Caruso sing?
Why?
Because he's the greatest of
all tenors.

You want to hear Elman,
Kreisler or Kubelik play?

Of course—everybody does, because the rarest thing in art is mastery. It is the thing which is given only to the chosen few and then only after a lifetime of effort, but you destroy all that when with the aid of some foolish little accessory you attempt to "modify" the supreme inspiration of a great artist to suit your own ideas of interpretation.

That's why we say "Always use Victor Machines with Victor Records and Victor Needles—the combination. There is no other way to get the unequalled Victor tone" in exact accord with the artists' interpretation. Victrolas \$15 to \$250. Victors \$10 to \$100. Terms to suit your convenience, if desired.

Police Desk Officer Is Given Big Surprise on His Birthday

Officer Fleck, who was kidnapped early to-day and taken over the city in the patrol. During his absence the officer's desk and room were decorated in many colors, including Halloween effects, pumpkins, gifts of all kinds, corn stalks and flowers.

To Encourage Baseball Instead of Bull Fights

Los Angeles, Cal., Oct. 22.—Venustiano Carranza, head of the de facto government in Mexico, is going to encourage the American game of baseball in the Republic as a substitute for bull fights and other diversions along the border, according to Adolfo Carrillo, his consular agent here.

EDISON TALKS OVER TELEPHONE

First Time He Uses Instrument, Voice Is Carried 3,400 Miles

At the Edison Laboratory in Orange, N. J., last night in honor of the thirty-sixth anniversary of the invention of the electric light and the celebration of Edison Day at the San Francisco Fair, a remarkable demonstration of the transcontinental telephone was given.

One of the unique numbers on the program was the transmission by wireless telephone of the diamond disc phonographic record of an address to Mr. Edison by Miller R. Hutchison as chief engineer.

Later William H. Meadowcroft, of the Edison Company, talked to his chief in San Francisco, and Charles Edison and Theodore Edison, sons of the inventor, talked from Orange to their mother.

Mr. Edison from San Francisco, made the following statement: "It may seem strange to those who know my work on the telephone carbon transmitter, but this is the first time I had ever carried on a conversation over the telephone. To talk across a line 3,400 miles on my first attempt at a telephone conversation seemed to be a pretty big undertaking, but the engineers of the Bell System have made it easier to talk that distance than it used to be to talk 34 miles."

Afterward this statement was made by J. J. Carty at Chicago: "It is true that we have succeeded in transmitting speech across the Atlantic Ocean from the Navy Tower at Arlington, Va., to the Eiffel Tower at Paris, using the same apparatus that we have previously employed in talking to Panama, Mare Island and Honolulu. The trial made from Arlington last night and reported to the newspapers today, employed the new A. T. & T. wireless system and was conducted by our engineers, Carl A. Helsing, B. E. Webb, and others of our staff at Arlington, Va., and H. E. Shreve and A. H. Curtis, two of our engineers at the Eiffel Tower at Paris."

CONKEY SAYS—DON'T WORRY—When you buy Poultry Remedies and Tonics you want results, and you'll get them if you use CONKEY'S. They are standard. They save life. Dealers Everywhere.

Edison Wires Best Wishes For Light Co. Smoke Cleaner Test

Following the initial tests yesterday afternoon of the new smoke cleansing system at the power plant at Ninth street, C. M. Kaltwasser, general manager of the Harrisburg Light and Power Company said that the experiment proved that more than 90 per cent. of the fine carbon dust could be cleared from the smoke before it reached the mouth of the stacks. The trials will be continued until the 100 per cent. efficiency is reached after which the method will be adopted permanently.

Committee Keeps Things Moving at Stag Party

Members of the Colonial Country club had a big time last night when the social committee held a stag and smoker. The amusement program kept 100 members and friends busy from 8 o'clock to 11.40. The stag committee did not permit one dull moment.
