cent., thus effecting another big saving. Mr. Bowman's oil for the pump-ing station costs 18 cents a gallon less than when he became super-intendent. He saved \$4,023,32 in 1913 over the prices pail before he took office in 1913. **Royal's Delinquency** Mr. Bowman compelled Royal and Copelin, of the sinking fund commission, to put on interest \$10,000 surplus which was not invested before Mr. Bowman took charge. It took Mr. Bowman took charge to the Royal and Cope-lin to do this. Who was getting the interest when Royal and Cope-lin were so anxious to keep the money from being invested for the city?

The receipts for 1914 were \$207,039.21 and the expenditures were \$126,123.21. The surplus was therefore \$80,915.93, as the print-ed reports shows, despite what Royal says to the contrary. Finally, nobody can dispute the fact that in 1914 Mr. Bowman turned into the city treasury this sum plus other amounts saved to the amount of \$84,441.25 in cash over and above his expenses for the first year of his administra-tion.
