POULTRY NEWS FEEDING OF MASH SAVES LABOR FOR THE POULTRYMAN

By Dr. Thomas J. Clemens, Practical Poultryman, Judge and Lecturer.

COPYRIGHT, 1915.

Increasing egg production in winter, when prices are high, is one of the biggest problems with which the amateur poultryman has to contend. In this article Dr. Clemens gives some valuable pointers for overcoming this difficulty by mash feeding, and tells why the dry mash is better than the wet.

WHEN poultrymen introduced mash feeding as a regular ration, it not only relieved them of a great deal of the labor of feeding, but it also enabled them to considerably increase their output of eggs. In fact, mash feeding practically revolutionized the poultry industry. Winter egg production has always been and is to-day the stumbling block of many amateurs. Thousands of birds have been idle during the months when eggs were bringing the highest prices, notwithstanding the fact that they were quartered in comfortable and sanitary houses. The mash feeding method has simplified this problem, and to-day anyone may get good results by employing this method and using common sense.

The proper feeding of fowls is a matter that requires good judgment. The most careful balancing of rations is of little avail, unless good judgment is used in administering them. It is possible to lay down some rules and to mention the proper ingredients, but the feeding itself is not, and never can be, a mechanical matter. The feeder who keeps in touch with his fowls, watching their feeding, studying their needs and their behavior, observing carefully the manner in which they respond to their treatment, can get results that are obtainable in no other way. Individual consumption varies from meal to meal, and from day to day, and is noted only by the close observer.

Mash feeding not only effects a great saving in labor—in downright hard work—but it gives excellent results in the health of the flock, and in the yield of eggs. It relieves the poultryman of considerable anxiety as to whether the fowls are being fed according to their likes or dislikes. Some poultrymen offer the objection that the method of feeding is likely to cause the fowls to get lazy and take too little exercise to keep in a healthy condition. This objection is based upon a misconception. The feeding of Dry Mash or Wet Mash feeding.

Wet mash or cooked mash consists of preparing a mash or dough of mixed meals, in summer cold water, and in winter hot water is used in preparing the mash. The ingredients are mixed thoroughly, until the mass is crumbly and not wet or moist "dough." Frequently cooked vegetables are boiled until soft and then mashed; the liquid is drawn off these boiled vegetables and used instead of water. Often cut or ground alfalfa which has been steeped in boiling water is used as the basis for this mash.

This wet or cooked mash is fed to the fowls in the morning, when the weather is warm, when there is no danger of the temperature dropping below freezing during the night, this mash may be put in the feeding troughs at night, when it is ready for the birds as soon as they come out of the roosts in the morning. It is necessary to feed wet mash in troughs and the feeding troughs must be kept scrupulously clean. They should be cleaned and hung up in the sun to dry after the fowls have finished feeding.

This means hard work and it has to be done every day—seven days a week and fifty-two weeks every year. Cooking and mixing the mash, feeding it in troughs, cleaning and drying the troughs involve hard work that must be done thoroughly in order to get the best results. Mash must be fed within a reasonably short time after it is prepared. Otherwise there is danger of fermentation, which is likely to cause trouble.

Improving the Quality of Table Poultry

In next week's issue Prof. W. G. Krum, Poultry Husbandman, Cornell University, Ithaca, New York, will describe special methods of fattening fowls for home and market and will give rules for grading carcasses. The illustration by Louis Paul Graham will be of Buff Cochins.

Deaths and Funerals

MRS. W. S. FILLING DIES
Mrs. Wilhelmina S. Filling, aged 61, wife of William H. Filling, a well-known retired passenger engineer on the Erie division of the Pennsylvania railroad, died last night at her home, 1408 North Sixth street. She is survived by her husband, two sons and one daughter, William H. Jr., Harry J. and Mrs. Joseph W. Gross. Funeral services will be held at the home Monday afternoon at 2 o'clock, conducted by the Rev. Henry W. A. Hays, pastor of the Methodist Lutheran Church. Burial will be made at East Harrisburg Cemetery.

JOHN HOOPES DIES
John Sherman Hoopes, aged 29, died this morning at a lingering illness, 1631 Regina street, after a lingering illness. He is survived by his wife and one child. Private funeral services will be held at his home Tuesday afternoon at 2 o'clock, the Rev. A. E. Hagen, pastor of Park Street United Evangelical Church, officiating. Burial will be made at East Harrisburg Cemetery.

MRS. MISAURI P. KIESTER DIES
New Cumberland, Pa., Oct. 30.—Mrs. Misauri Prowell Kiestler, died at 9:40 o'clock after a long illness. She came to New Cumberland many years ago. She is survived by two sons, Edwin, of Harrisburg, and William, of New Cumberland, and a daughter, Nellie, also of New Cumberland. Funeral services will be held at the home on Monday afternoon at 2 o'clock, conducted by the Rev. Y. S. Adams, pastor of Baughman Memorial Methodist Church. Burial will be made in Mt. Olivet Cemetery.

RUSSIANS SAIL FOR BULGARIA
Copenhagen, Oct. 30, via London, 11:53 A. M.—Large contingents of Russian troops have set sail from the Black sea ports of Odessa and Sebastopol for the Bulgarian coast, the Berlin "Tageblatt" says.

Lifting the Standards Of Storekeeping

ANY of our fathers and mothers and grandparents remember when store-keeping had its mysteries and shopping was an adventure.

But those were the "Buyer Beware" days. With the passing of secret price marks and other antiquated methods, that period has almost deserted memory and Honor in storekeeping prevails generally. Keeping store is becoming more and more a study of scientific application.

Progressive merchants all over the country are striving to know the needs of Humanity and serve it properly. To extend greater opportunities to employes is their universal code, and by such action, benefit the public in an indirect way.

It is generally admitted that storekeeping has, in the last few years, made the greatest stride in the upliftment of standards.

To possess the most modern store is a worthy aim.

SECOND REFORMED MUSIC

The music at the Second Reformed Church for Sunday is as follows: Morning—Prelude and Fugue, Bach; soprano solo, "Open the Gates of the Temple," Knapp, Mrs. Ada Culp Bowman; anthem, "Sweet the Moments Rich in Blessing," Reichardt; postlude, "Triumphal March," Costa. Evening—Prelude, (a) Ave Maria, (b) "There is a Green Hill Far Away," Gounod; contralto and tenor duet, "Come Unto Me," Miss Ethel Henry and R. Zarker; anthem, "Praise Ye the Father," Gounod; postlude, "March Solennele," Gounod.

STATE FUNDS DROP WITH DULL THUD

General Fund at End of September Had More Than Total Balances Today

State treasury disbursements ran ahead of the receipts again during the month of October, the statement of the business for the month showing a further decline as compared with the statements at the end of September and of August. The cash reported on hand amounts to only \$3,845,161.31 in all funds, the lowest in years.

ALLAN LINER WAS SUNK BY TORPEDO

U. S. Naval Experts Say Fragment Found on Board Was Not Part of Mine

Washington, Oct. 30.—Secretary Lansing announced to-day that the Navy Department had definitely established the fact that the fragment of the engine of war which sank the Allan liner Hesperian was a part of a torpedo. The German government has persistently denied that the Hesperian was torpedoed. In the opinion of United States naval experts the fragment could not have been a part of a marine mine.

APPOINT VIEWERS
Paul G. Smith, Clark E. Cowden and Harry Fahnestock were to-day appointed a board of viewers to assess damages and benefits, if any, incident to the opening and grading of Seventeenth street, from Herr street to a point 220 feet north of Verbeke street.

TO IMPROVE HOUSES
Christian W. Lynch obtained a building permit this morning to build an addition to the two and one-half story property at 13 South Front street, the improvement to cost \$1,000. David Rogers will remodel a two-story dwelling on the north side of Woodlawn street 100 feet north of Twenty-Sixth street, to the extent of \$250.

READING BOY KILLED BY AUTO
Reading, Pa., Oct. 30.—Robert Gerhard, 10 years old, son of Mr. and Mrs. Robert Gerhard, was fatally injured here last night by being struck by an automobile.

FIRE DESTROYS LOCKUP
Mechanicsburg, Pa., Oct. 30.—What's believed to have been an incendiary fire about 2:30 o'clock this morning destroyed the borough lockup.

It Pays to KNOW

To make money with poultry, you have got to know how to hatch, feed and care for them. Guess-work is expensive and unnecessary.

Learn Poultry Keeping Avoid Costly Mistakes

The time to learn how to keep poultry is before you make costly mistakes. The I. C. S. will train you in the methods followed by the most profitable poultry plants. Hundreds of money-making poultrymen owe their success to the I. C. S.

"I made several attempts to establish a poultry business; but it was not until I had learned the principles contained in the I. C. S. Course in Poultry Farming that I was able to meet with any degree of success," writes G. M. Burr, Mashoppen, Pa. "I now have a well established and successful poultry business."

"The I. C. S. Course in Poultry Farming is full of valuable information and very practical," writes Frank Borton, Elba, N. Y. "I have had the best results from applying the methods taught by you."

Poultry Book Sent Free
The I. C. S. will be glad to send you free, a handsome 56-page book that tells how you can get the special training that you need to make poultry-keeping profitable. They will show you the best way to hatch, how to feed and raise poultry, how to build poultry houses, how to establish and operate a money-making poultry farm, and how to breed stock that will win prizes.

Everlasting Walks Steps and Porches

Concrete keeps you out of mud and slush. Concrete walks, steps and porch floors are even, clean, attractive. They are easy to free of snow, last like stone, save paint and repairs. Such improvements will add many times their cost to the value of your property.

Insure the quality of your improvements by using the best materials. Don't risk using either inferior cement or sand. ALPHA is a superior grade of Portland Cement that makes everlasting concrete work. It is tested hourly while being made; you can depend on every ounce being of full binding strength. ALPHA always gives satisfaction.

Call on us for more information about concrete work. We will give you a copy of the large, illustrated book, "ALPHA Cement—How to Use It," which tells how to make floors, steps, walks, driveways, foundations, and scores of other permanent improvements with ALPHA, the Guaranteed Portland Cement.
