

Mirror Films, Inc.

Calls Your Attention to the Fact That the Tallest Office Building in the World (The Woolworth Building) and One of the World's Biggest Industries (the Motion Picture Business) Were Built Up from Dimes and Nickels.

Fifth in Size of the Industries of the United States Is the Motion Picture Business

The Mirror Films, Inc., has been formed to produce motion pictures. It has one of the finest studios in the world, is surrounded by the best players, and has a board of directors noted for keen business judgment and executive ability. The capital stock is \$2,500,000—and you are invited to become a subscriber to the corporation at \$5 per share. You may buy as few as 5 shares, and as an inducement for quick action, and for a limited time only, each share of the 7% cumulative preferred stock carries with it one \$5 share of common treasury stock—and without extra cost to you.

Immense Amount of Money in Motion Picture Industry

One of the biggest film companies in America was formed some years ago with a capital stock of \$6000. Since its incorporation it has paid out many millions in dividends—and the capital stock is still \$6000.

Another film company, capitalized originally at \$50,000, has increased its capital to \$1,000,000—and is now paying 24 per cent a year on the latter figure.

Now for the Films themselves, and the money made from them:

"The Million Dollar Mystery" cost about \$93,000 to produce. It brought its producers about \$1,000,000—and is still being shown.

"Traffic in Souls" cost about \$6500 to produce. It, too, has drawn nearly \$1,000,000 to date, and is still being shown.

"The Birth of a Nation" cost about \$150,000 to produce and will net millions.

Such Are the Profits in the Motion Picture Industry

Never was a better time for investment in the film industry. Virtually every small town in the world has a motion picture theater—there are, in the United States alone, many thousands of them. Each theater uses from 10 to 50 reels a week.

Mirror Films Stock Is \$5 Per Share

Your investment of \$5 PER SHARE (with your bonus of one share of common stock for every share of preferred stock that you purchase) will be safeguarded by the following business men who have invested their own money and who realize the sterling qualities of this gigantic industry, and who form the board of directors:

CLIFFORD B. HARMON, of Wood, Harmon & Co., whose successful business methods made him the biggest suburban real estate operator in the world, has accepted the Presidency of the company.

CAPTAIN HARRY LAMBERT, Vice President, formerly of the Vitagraph Company, will have personal supervision of the productions. His work as a producer of pictures has been a delight to hundreds of thousands in this country and abroad.

- WILLIAM J. HOGGSON**, Second Vice President, President Hoggson Brothers, Inc.
- ANDRES DE SEGUROLA**, Third Vice President, Metropolitan Opera Co.
- W. C. TOOMEY**, Fourth Vice President, formerly Vice President and General Manager Mutual Film Corp., President and General Manager Continental Features Co.
- FRANK S. HASTINGS**, Treasurer, Executor of the Estate of the late President Cleveland, President Russian Symphony Orchestra.
- JOHN W. HOUSTON** (retired), recently law partner of Ex-Governor Hughes.
- RIFUS B. COWING, JR.**, attorney-at-law.

- JAMES KING DUFFY**, President of Export Oil Corporation and Phoenix Reining Co.
- A. A. ANDERSON**, well known artist and capitalist.
- EDWARD B. CLOSE**, Spalding, Close & Co., Bonds.
- JOSEPH ROWLAND HUNT** (Architect), Secretary and Director Fine Arts Federation of New York.
- RICH G. HOLLAMAN**, father of the motion pictures in America, President of the International Exposition Company.
- HARRY HOWE SHELLEY**, Eminent Organist and Composer, Director of the Players' Club and Metropolitan Opera Club.

Further information, prospectus, etc., mailed on request—but you must act quickly to participate in the bonus of 100 per cent of treasury stock issued with your 7% preferred. A better plan is to mail check or money order direct. Stock will be issued in the order of receipt of subscriptions, and the rule of first come, first served will be rigidly followed while the limited amount of stock we have for sale lasts.

MIRROR FILMS, INC., 16 EAST 42ND ST., NEW YORK CITY.

BUFF COCHINS

COPYRIGHT, 1915.

Cochins are one of the oldest breeds 1840 and 1850, known as Shanghaies of poultry. They are descended from Malays and Chittagongs—from which fowls imported from Asia between the Brahmas also were developed.

A Trial Package Free

Dr. Hess Poultry Pan-a-ce-a
At any of these Dealers

We want you to go to the nearest dealer named below and get a trial package of Pan-a-ce-a. At this time of year your hens need a tonic to help them over the weakening effects of moulting and get them started laying regularly. Dr. Hess Poultry Pan-a-ce-a is the finest tonic you can get to Condition Your Hens—Help Them Lay. It makes them vigorous and hardy—tones up the dormant egg organs and keeps hens cackling. The trial package is free. See your nearest dealer below.

FATTENING FOWLS FOR MARKET IS VERY PROFITABLE

Conditioning Is Easy When the Birds Are Fed in Crates; Meal and Buttermilk or Sour Milk Used

Demand For Fancy Grades Is Greater Than the Supply, but Poor Stock Always Is Plentiful

By W. G. Krum
Department of Poultry Husbandry,
New York State College of Agriculture,
Cornell University.

COPYRIGHT, 1915.

When the weight of market poultry can be increased on an average of more than three pounds per bird, at a cost of 8 to 12 cents per pound, the advantage of conditioning poultry is apparent. Since the fattening increases the value of every pound, it will be realized that conditioning is highly profitable. In this article Professor Krum gives directions for fattening poultry for market.

ONLY a small proportion of poultry is marketed in first-class condition, properly fattened. Yet the process of conditioning poultry is so simple, and the increase in the quality and market value makes the net profits so much larger that there is no excuse for the great quantity of poor table poultry to be found, even in the best markets.

By fattening we do not mean filling a fowl's body with large deposit of oily fat, such as is often found in old fowls. This, when cooked, separates from the meat, leaving it almost as tough as that of an old, thin fowl. A good fowl should have large, soft muscles with sufficient fat to keep them tender, juicy and fine flavored. This not only makes them desirable for home use, but they will sell in good markets for a much higher price per pound.

How to Select a Good Bird

A good buyer of choice stock looks for a round, plump bird that was dry-picked and not scalded, as the latter process tends to harden the skin and meat. Scalding also lessens the market value, as it forces dirty water into the carcass, giving it a very undesirable appearance and takes out much of the sweet flavor.

If the meat is soft and tender it will be possible easily to pinch with the thumb and forefinger entirely through the large muscle in the wing. This is a sure indication that the fowl is tender than is a soft breastbone. It often is found that old fowls, properly fattened, are more desirable than young ones killed directly from the farm range where exercise toughens the muscles.

Three Ways of Fattening

The best way to fatten poultry is to restrict exercise and feed in one of three ways: Machine, crate or pen. While the machine method gives larger profits it is difficult to obtain the skilled labor necessary to handle this class of work and it is not practical with small flocks. In machine feeding the operator inserts a rubber tube in the fowl's throat and presses a lever which fills the crop with a mixture of meals and milk.

Pen fattening is best for turkeys and is satisfactory with young broilers, but the most popular method is crate feeding. The crate is two feet square and has a bottom of slats or one-half inch mesh wire cloth. A coop of this size will hold six or eight mature birds or ten to twelve young ones. The coop should be located in a cool, shady place in hot weather and in a warm, comfortable room in cold weather.

The fowls should be dusted thoroughly with a good lice powder, as birds infested with lice will not fatten well. Neither do chickens or fowls of low vitality fatten readily. Lice powder should not be used the last week before killing as it is liable to give a bad flavor to the flesh.

Feed Sparingly at the Start

Poultry should be starved twenty-four to thirty-six hours before being given the fattening ration and should be fed sparingly the first few days. The ration is increased gradually until they have all they will clean up in about thirty to twenty minutes a day. The first feed is given as early in the morning as they can see to eat, and the last as late at night as they can see to clean up the feed in good shape. Feedings should be at the same hours each day, as irregular feeding lessens the appetite. If the birds have more for a meal or two than they can digest, the loss of appetite and loss of weight. Care should be taken to keep up a good appetite.

A good ration consists of three pounds of cornmeal, three pounds of buckwheat, the hulls removed, three pounds of low grade wheat flour or good white wheat middlings, and a small quantity of charcoal. These are mixed with four skim milk or buttermilk. The latter is preferred for its consistency of batter, allowed to stand in a warm place and sour twelve hours before feeding. One quart of milk usually is sufficient for one and a half pounds of feed. When milk can not be obtained one-fourth to one-third of the ration could consist of good meat scraps, although this will not give as profitable results as the skim milk or buttermilk.

Young broilers should have, in addition to the above, a small feeding at noon of cracked corn and wheat as they are otherwise more liable to go "off their feed."

Whole Corn Not the Best Feed

Many farmers think that as corn contains a larger percentage of fat than any other grain, it can be fed profitably as an exclusive fattening feed. At the Pennsylvania State Experiment Station fowls fed on shelled corn exclusively gained in three weeks less than one-fifth of a pound each at a cost for feed of from 30 to 60 cents per pound of gain, while similar birds, fed cornmeal, mixed with buttermilk gained in the same period, showing that in the case of the whole grain, much energy is wasted in grinding it. A ration of several finely ground grains, mixed with buttermilk gave the best results and produced a gain at a cost of seven cents for each pound gained.

Cost of Gain Under 8 Cents a Pound
In 1911 fattening experiments were carried on at four of the government experiment stations with nearly 395,000 fowls and the results were published by the United States Department of Agriculture, at Washington, D. C., in Bulletin No. 21, which can be obtained through your congressman or by writing directly to the Department of Agriculture. In these experiments various rations were fed and the fowls averaged 3.39 pounds of feed for each pound of gain in weight, the feed costing 7.71 cents. The greatest gain was made early in the season, while in November and December the average cost per pound gain was from 9.8 to 11.6 cents.

The rations giving the best results were No. 1, consisting of three parts cornmeal, two parts of low grade wheat flour and one part of shorts

Warms the Bedroom in a Jiffy

It's no fun to crawl out of your warm bed and have to dress in a cold room while your teeth chatter and chills run up and down your spine. You stand a mighty good chance of catching a cold or the grippe—yes, even pneumonia. And it's not at all necessary.

Get a Perfection Oil Heater and in a few minutes your bedroom will be as warm as toast and make dressing a pleasure instead of a misery. And if there's an infant in the house, night after night you'll bless the convenience of a

PERFECTION Smokeless Oil Heater

Why, it'll warm baby's milk in a jiffy and save you many a cold midnight trip to the kitchen. It's economical, too. You don't have to keep piling the coal in the furnace simply to keep one room warm.

The Perfection burns kerosene, the most economical fuel you can buy. It will not smoke, soot or create unpleasant odors. There are no ashes to bother with. Can be safely carried from room to room when lighted. The best results are obtained by using Atlantic Rayolight Oil.

Perfection Oil Heaters are sold by dealers everywhere for \$2.75 to \$5.00.

When the alarm clock starts to weaken—when it begins to gurgle rather than ring—give it a bath of ATLANTIC RAYOLIGHT OIL and it'll usually take a new lease on life. Over at your house how is kerosene used? Begin to think about it seriously and read these ads to learn why.

THE ATLANTIC REFINING COMPANY,
Pittsburgh and Philadelphia

Milk and Kerosene
Just as some milks are richer, creamier and more wholesome than others, so also kerosenes differ in their desirable qualities.

ATLANTIC Rayolight
is to ordinary kerosene what the rich milk of the Jersey cow is to ordinary milk. Atlantic Rayolight Oil burns without smoke, soot or smell, but at the same time costs no more than ordinary kerosene.

and No. 2, consisting of three parts of cornmeal and two parts of low grade wheat flour.
When poultry fattened with sour milk or buttermilk is shipped to market it should be thoroughly chilled to remove all the animal heat, and be packed in neat packages marked "Milk fed" in order to bring the extra price paid for this class of goods. The larger breeds are preferred by the commercial fattening establishments, but the smaller breeds respond readily to this type of fattening.
As the demand for fancy table poultry of all sizes is always in excess of the supply, and poor stock usually is in excess of the demand, no poultryman can expect to obtain all that is due him unless his market stock is properly finished and shipped to the best markets.

Turkeys Are Money-Makers
Next week Reese V. Hicks, manager of the largest poultry farm in the world, will write of the Thanksgiving Day bird. He will tell how turkeys are raised and how to select a good one for the holiday dinner. The illustration will be of Narragansett turkeys.

Hallowe'en Masquerade at Penbrook Town Hall
Members of the S. S. S. E. Club held a masquerade with Hallowe'en appointments at the gaily decorated town hall of Penbrook, with games, dancing, and refreshments as features of pleasure.

In attendance were the Misses Sylvia Piper, Mary Garverich, Sara Packer, Anna Packer, Martha Yeager, Helen Manuel, Alice Snyder, Marjorie Fells, Miriam Hoover, Freda Dahr, Sara Kugle, Ruth Reed, Lydia Snyder, Anna Bittle, Charlotte Minick, Mary Mead, Edith Searfaus, Susan Kennedy, Theresa Kennedy, Blanch Swartz, Jennie Swartz, Thelma Snyder, Beatrice Snoddy, Gertrude Miller, Jennie Snyder, Frances Smith, Jean Swartz, Irene Little, Gertrude Minnick, Mrs. C. L. Gibson and daughter Dorothy, the Misses Mary Snyder, Jennie Snyder, Ella Fells, Ellen Reed and Mrs. Sevaldia Kennedy, Charles Wirt, M. E. Swartz, Donald Heagy, Charles H. Snoddy, O-

A Healthy Baby.
Everyone wants baby to be healthy. It is baby's right. To insure a strong, vigorous baby, the hopeful mother must be free from worry, care and strain. The complete joy of expectation should not be marred by unpleasant feelings. Mother's Friend is recommended by thousands of women because this external remedy relieves the pressure reacting on the nerves and the unnatural strain upon the cords and ligaments said to cause nausea, morning sickness and many local distresses. It is absolutely safe and dependable and has been in use for generations. First class drug stores can supply it.—Advertisement.

HAGERSTOWN WEDDINGS
Special to The Telegraph
Hagerstown, Md., Nov. 6.—Miss Virgie Gipe and John E. Koons, both of Hershey, Pa., were married yesterday at the parsonage of the First Baptist church in this city by the Rev. E. K. Thomas.

INSURANCE OFFICERS CHOSEN
Hummelstown, Pa., Nov. 6.—Officers and managers of the Mutual Fire Insurance Company were chosen at a meeting yesterday as follows: Managers: John J. Nissley, Joseph F. Romberger, J. S. Sherk, John H. Wiltmer, George M. Hoeker, F. J. Walton, J. Q. A. Rutherford, Joseph S. Strickler, Albert M. Schaffner, Joseph M. Brightbill, Elmer W. Dockey and Albert B. Shank. Officers: President, F. J. Schaffner; vice-president, R. J. Walton; treasurer, Joseph M. Brightbill, and secretary, C. H. Miller.

KILLED THREE COONS
Blain, Pa., Nov. 6.—Harry C. Henry, Miles Shannon, Paul Gibson, of this place and two men from Lancaster county killed three fine coons last night.
