Looking Down From The Capitol Dome

VER long lines of steel, trains may be seen departing from Harrisburg in every direction—disappearing behind the hills or 'round the bend of the river; carrying with them both good and bad opinions of our city.

¶ If it were possible to know the thoughts of those who may never willingly come to our city again because of reasons unknown to us living here, would it not be a basis for improvement, and would not a better Harrisburg be the outcome?

¶ Could we not improve and make this a better store if we were always told of the flaws that appear in our organization and service from time to time, as they are bound to?

¶ Most certainly; and very often a kindly complaint will give you (and others) the desired satisfaction in merchandise which you have purchased—the courtesy which you deserve; and the service which you are entitled to.

¶ This is no county fair or lottery—we must give value for value; and we are here to please. Sometimes you can help us.

STATE INSURANCE FORMS ISSUED

Seventeen Questions, One of Which Is Subdivided, Are Asked Employers

Seventeen questions, one of which is divided into fourteen interrogatories, are contained in the forms just issued by the State Workman's Insurance Fund Board for employers to apply for liability insurance in the State fund. The rates have not yet been announced, but it is probable that they will be made known soon. The blanks state that the filing of an application does not bind any one, but that the State board will send a statement of the cost of State insurance for comparison with other forms.

The blank asks information on all establishments, product, work done away from plant and the general form of operation together with statement of division of operations and estimated average number of employees and estimated payroll for a year. Executive officers are not to be included at more than \$1,000 a year as that is the limit of insurance. Information is also asked as to extensions, whether explosives or corrosive chemicals are used, number of elevators, boilers and other details.

The organization of the district work of the Compensation Board will follow appointment of referees, the preliminary work being well advanced and forms prepared for employers.

Accidents Decrease
Accidents in the metal trade industries which had shown a notable increase during the summer months because of the "speeding up" due to war orders dropped during October, according to a summary of accidents for that month issued by the statistical bureau of the State Department of Labor and Industry. There were 5,129 accidents during the month or ten per cent. fewer than in September and August.

Ninety-three of the accidents resulted fatally, sixty-four men being killed in mines and fourteen in the metal trades. Of those injured 471 were disabled more than thirty days. Most of the accidents occurred on Wednesday.

Since the first of the year there have been 43,890 accidents in the State, 837 of them fatalities. Governor Brumbaugh has issued in-

vitations to the Welfare, Efficiency and Engineering conference to be held at the State Capitol November 15 to 19, calling attention to the plan to have set forth in addresses the work of the various State departments having to do with engineering. The conference is the third to be held, having been inaugurated by the Engineers' Society of Pennsylvania in 1913, but this year departments of the State government are co-operating to a greater extent than before. The Governor will open the conference with an address outlining what the State is doing. In connection with the conference there will be an industrial exhibit illustrative of safety work. Prominent men will preside at the various sessions.

Over Eighteen Thousand Cadillac Eights in Year

Including the cars built and shipped from the factory at Detroit on October 23, the Cadillac production of its V-type, eight-cylinder model reached the total of 18,159 cars, of more than half a million dollars was installed. Thus it was imperative to design, manufacture, install and systematize hundreds of new machines, in order to reach a volume of production on a type of car entirely new, not only to the Cadillac, but to the industry in America.

In view of these facts, the building of more than 18,000 cars of the new type, in a little more than a year, is a manufacturing achievement seldom equaled.

Figures show that the Cadillac production up to the date named is several times the number of all the other cars with V-type engines built in this country since the Cadillac Eight was first announced. It is also shown that no other model of high grade automobile has ever been produced in anything like the Cadillac quantity.

YOU'RE BILIOUS! CLEAN LIVER AND BOWELS TONIGHT!

Don't stay headachy, sick, or have bad breath and sour stomach.

Wake up feeling fine! Best laxative for men, women and children.

Enjoy life! Remove the liver and bowel poison which is keeping your head dizzy, your tongue coated, breath offensive, and stomach sour. Don't stay bilious, sick, headachy, constipated and full of cold. Why don't you get a box of Cascarets from the drug store and eat one or two to-night and enjoy the nicest, gentlest liver and bowel cleaning you ever experienced. You will wake up feeling fit and fine. Cascarets never gripe or sicken like salts, pills and calomel. They act so gently that you hardly realize you have taken a cathartic. Mothers should give cross, sick, bilious or feverish children a whole Cascaret any time—they act thoroughly and are harmless.—Advertisement.
