## \$25.00 Hickey-Freeman Suits For Men, \$15.00 A Most Important Event in High-Grade Clothing

NOTHING is so easy to slight as the tailoring in a suit of clothes.

The heavy pressing iron can be made to cover up a multitude of sins.

The workmanship in Hickey-Freeman-Quality clothing starts with absolutely the best materials—not only woollens but linings, thread and canvas. Expert Hickey-Freeman-Quality tailors take materials of proved perfection and mould them into finished and perfected garments by using the most thorough and efficient methods known to the tailoring industry.

Hickey-Freeman-Quality garments, splendidly tailored in splendid fabrics, keep their good looks. Style is built into them from the very start. Their good points become more and more apparent in daily use.

### Naturally When We Had the Chance to Sell \$25.00 Hickey-Freeman Suits of Quality at \$15.00 We Took Advantage of It

- New rolled oats, 6 lbs. .... 28c

## IMPORTANCE OF AGRICULTURE TO PUPILS DISCUSSED

### Expert Says Country Will Soon Raise 100 Bushels of Corn to An Acre

Declaring that in the near future farmers in this country will not be satisfied unless they raise 100 bushels of corn to the acre or 50 bushels of wheat in the same territory, Professor L. H. Dennis, State agricultural expert, in an address before the teachers of the Dauphin county institute, in session in the House of Representatives, drove home with a mass of facts and figures the importance of "Agriculture in the Rural School" this morning. County Superintendent F. E. Shambaugh, in a short talk preceding Professor Dennis' address, said that he was slightly disappointed with the results of the corn growing contest held in this state and claimed that a number of teachers having courses in agriculture were not qualified to teach the subject. Professor Dennis in his talk divided the present-day farmer into three classes, the tired, retired and rubber-tired. He said that last year about 50 per cent of the automobiles sold in this country were purchased by farmers and that figures for the present year indicate that more than 70 per cent of the sales in 1915 were made to farmers.

For your selection we show a variety of new models, in plain and plaited styles.

Dives, Pomeroy & Stewart—Street Floor.

Interested in their work and forget themselves.

**Please For Poetry**

At the section meeting held in Technical High school by the grammar and high school division of the institute, Professor H. J. Wickey presided. Dr. O. L. Warren, of Elmira, New York, spoke on "Poetry in English Work."

Dr. Warren blamed the teachers for the dislike of poetry, he said was so evident in the present day, and said that the only time to impress a child with the value of poetry so that it will be appreciated in life, was between the age of 1 and 7 years.

Practically all of the teachers favored having the photograph in the school work; that only words used in

work was considered an important and useful addition to the equipment of the rooms.

**Speaks on Spelling**

The general session opened this morning with devotional exercises lead by the Rev. Thomas Relsch, of Christ Lutheran Church. John Fox Weiss, urged the teachers to boost the Red Cross Stamp movement again this year to raise funds for use in fighting tuberculosis.

At the afternoon session Dr. Warren spoke on "The Spelling Problem," using four points to illustrate his talk. He claimed that people of to-day are better spellers than they were fifty years ago; that only 3,000 practical words should be taught boys and girls in the first eight grades of public school work; that only words used in

writing should be taught, and that the teachers should not use rules but habit methods.

The other address of the afternoon was made by Mrs. Alice M. Carmait, of the University of Pittsburgh, who spoke on "What Is Meant by Geography History." She emphasized the importance of geography in history giving brief accounts of historical events both modern and ancient, to prove her statements.

At both morning and afternoon sessions Miss Sadie M. Hunting conducted an instruction course in the Palmer method of business writing. "Dietetics" will be discussed in the House of Representatives this evening. Last night Dr. W. H. Man spoke on "The Family That Lives in the Basement." The address to-morrow morning will

be made by Dr. P. P. Claxton, United States Commissioner of Education, of Washington, who will speak on "Vital Relations in Education." In the afternoon the following addresses will be made: "Pedagogical Signboards," by Dr. Warren, and "Co-operation of School and Home," by Dr. Claxton. In the evening an entertainment will be given by the Suwanee River Quartet.

On Thursday the twenty-fifth annual session of the directors' association will be held in the Technical high school. The meeting will close after the disposal of several important business items.

At the section meetings to be held to-morrow several important subjects have been included in the program of round table discussion. The rural division session will be in charge of Assistant County Superintendent W. R. Zimmerman

man and the speaker will be County Superintendent Shambaugh. The primary and intermediate departments will be conducted by Superintendent Wickey, of Middletown, and the high school and grammar division will be in charge of Superintendent McGlimes, of Steelton. Among the subjects in the discussion will be "The Place of the High School in Developing a Better Spirit and Industrial Efficiency" and "Is It Practicable to Send High School Seniors Who Contemplate Teaching to the Rural School for Practice and Observation?"

**MANUFACTURERS TO MEET**

The workmen's compensation act will be thoroughly discussed by manufacturers of the city at a meeting in the Board of Trade this evening, at 8 o'clock.

**U. S. Guardsmen Take Up Defense Problems**

By Associated Press

San Francisco, Nov. 9. — National defense and the problems of national preparedness were the principal topics of discussion before the annual session of the National Guard Association which opened here to-day.

Adjutant General Thomas J. Stewart of Pennsylvania, president of the association, called the meeting to order.

Establishment of National Guard on a federal pay basis, with consequently greater national control and fixing the status of militia medical officers in the volunteer army in time of war are to lead to interesting discussions.
