TURN OVER TIME

When Nature Hints About the Food When there's no relish to food and all that one eats doesn't seem to do any good then is the time to make a turnover in the diet, for that's Nature's way of dropping a hint that the food isn't the kind required. "For a number of years I followed railroad work, much of it being office work of a trying nature. Meal times were our busiest, and eating too much and too quickly of food such as is commonly served in hotels and restaurants, together with the sedentary habits, were not long in giving me dyspepsia and stomach trouble which reduced my weight from 205 to 160 pounds. "There was little relish in any food and none of it seemed to do me any good. It seemed the more I ate the poorer I got and was always hungry before another meal, no matter how much I had eaten. "Then I commenced a trial of Grape-Nuts food and was surprised how a smaller saucer of it would keep me along, strong and with satisfied appetite, until the next meal, with no sensations of hunger, weakness or distress as before. "I have been following this diet now for several months and my improvement has been so great all the others in my family have taken up the Grape-Nuts with complete satisfaction and much improvement in health. "Most people eat hurriedly, have lots of worry, thus hindering digestion and therefore the food need that is predigested and concentrated in nourishment. "There's a Reason." Name given by Postum Co., Battle Creek, Mich. "Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.—Advertisement.

"The Thinkers of the Country Are the Tobacco Chewers"— said one of the greatest thinkers this country ever produced.

The Man As Keen As A Sharp-Edged Tool— is not the one who chews strong, black tobacco.

When you want a workman who can "cut to the line", look for a PICNIC TWIST chewer. The mildly stimulating effect of mild PICNIC TWIST makes eye and nerve alert and keeps them so. The "keeping them so" is where strong tobaccos "fall down".

Chew the long-lasting sweetness of PICNIC TWIST as you work. When the whistle blows you'll feel all right. And PICNIC TWIST'S mildness does not rob it of any of the taste you expect your tobacco to have. Every soft, mellow TWIST of PICNIC is chuck full of "good tobacco-ness".

Picnic Twist 5c CHEWING TOBACCO. Includes an image of a pack of tobacco and a circular logo with 'COUPONS OF VALUE'.

YANK FIELD TO SEAT THOUSANDS close inspection of the park yesterday in search of new ideas to embody in the New York plant, which is to be constructed within a year. It will be capable of seating about 30,000 persons on a single deck arrangement, with steel work designed to carry a second deck if desired in the future. CARBUNCLE CAUSES DEATH Special to The Telegraph Waynesboro, Pa., Nov. 11.—Jeremiah Andrew Collins died yesterday afternoon at his late home at 133 Ridge avenue, aged 57. Death resulted from a carbuncle on the back of his neck.

SEE OUR EXHIBIT (Booth No. 37) AT THE Pennsylvania Industrial & Public Welfare & Engineering Conference

All of next week from 10 a. m. to 10 p. m., at the Harrisburg Railway Company buildings, Eleventh and High streets. This exhibit will be representative of the very best industrial and engineering concerns in the country.

We Will Show in Actual Operation THE FAMOUS "OLDS" GASOLINE ENGINE

Known and used the world over. This engine has been especially designed for farm use and general purpose work. Thousands of "OLDS" engines are in use on farms in every part of the country. They are also used extensively by contractors and builders, in shops of all kinds, in pumping stations, electric lighting plants and everywhere that a dependable engine is used. When you buy an "OLDS" you get an engine of known proved value. Small sizes for running power washing machines, Woodsaws, Meat Grinders, Separators, Churns, Feed Mills, etc. SEE THEM, TALK TO US ABOUT THEM.

"Quicker Yet" Model 2 Engine driven, motor, \$50.00. Liberal terms. Discount for cash.

ELECTRIC DRIVEN AND GAS ENGINE DRIVEN

There is absolutely no other Power Washing Machine to compare with it for completeness, simplicity, durability and service. Come, see it operate just as you would operate it. You will want it I know.

DESIGN. This machine was designed to satisfy the demand for a power washer, for use on the farm, for use in the city home where real sanitary conditions are desired and can be had only by home washing which prevents contamination with disease-laden clothes of others, and for use by the smaller hotels. It is the most advanced type of platform washer on the market and the only washer built equipped with a wringer which both squeezes and wrings. It is built for use with either electric motor or gasoline engine.

SWINGING AND SLIDING WRINGER. Wringer built specially for power washer requirements, built with extra high grade rolls and quick-release lever. Mounted on extra heavy iron frame which moves easily from tub to end of platform. Can be swung to any position desired—serves one to six tubs. Wings from washer to rinse tub—designed to bling and can then be reversed and wash wrung into basket. While wringing, another batch of clothes is being cleansed in the machine—each operation being independent of the other. Will wash and wring at the same time.

MOTOR. One-quarter horse power—specially designed to meet power washer requirements. They are especially wound to overcome momentary overload, sometimes caused by crowding the wringer. They are the best that brains and money can produce.

TUB. Highest grade Louisiana Red Cypress, tongued and grooved and bound together with non-rust steel hoops. Drained from bottom by metal faucet. Double lid, corrugated on under side. Sides and bottom deeply corrugated and sanded to a glass-like smoothness.

Not a bolt, screw or nail through tub within the water line. ADJUSTABLE DOLLY OR ACATOR. Cross arm wood dolly—the greatest of washers; hung low in tub. Automatically adjusts itself to any load—will wash one garment or a tub full. Dolly post has swivel knob above lid which permits raising the dolly while machine is in motion, giving a new hold on the clothes. This facilitates washing and prevents clothes bunching in the tub. No iron projects through the dolly to catch, tear or soil the clothes.

SHAFTING, GEARS AND CLUTCH. Heavy, cold rolled steel shafting running in long, metal bearings. Washing mechanism and wringer are thrown in and out of operation by a clutch—gives operator absolute control at all times. All gears permanently in mesh—can not strip or chip. Cut from blanks, cost more than cast gears—worth more.

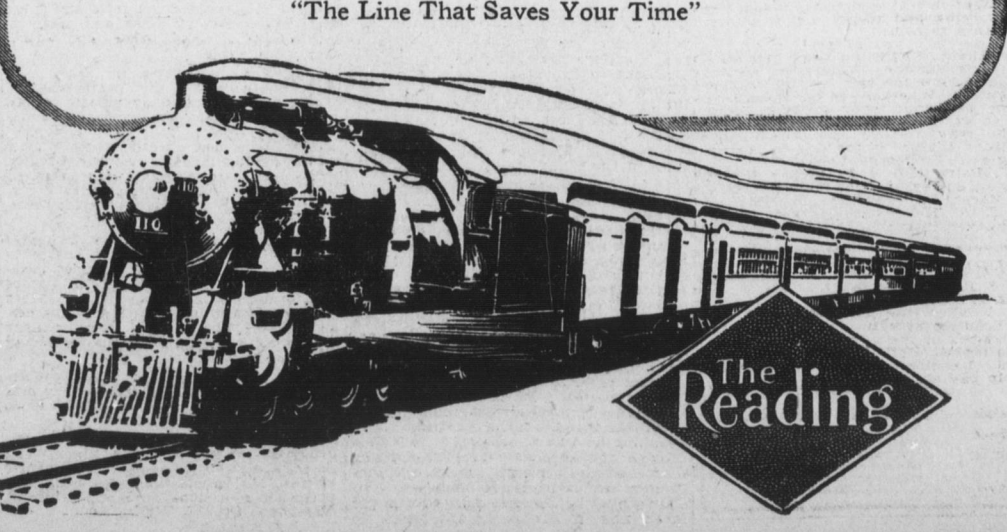

SAFE TO OPERATE. All heavy parts beneath platform. No heavy parts on lid. All other working parts enclosed. Lid is locked while washer is in operation, making access to tub impossible without turning lever which throws clutch stopping machine; assures operator against accident. Lid can be raised without disconnecting any of the parts. SANITARY. Cypress wood is a non-absorbent of water. It won't give forth an odor, such as inferior woods do. When properly cared for, it won't shrink, warp, crack or split; therefore it won't leak.

WALTER S. SCHELL QUALITY SEEDS HIGH GRADE FARM MACHINERY 1307-1309 Market Street, Harrisburg.
